I guide and support you

In the HABIL-Peer-Colloquium™, I support Pre- and Postdocs as well as recently appointed Professors in strategically developing their individual paths in research, teaching and third mission. Together, we refine the common thread of academic careers, develop realistic timelines, and strengthen perseverance.

Topics such as strategic career planning, balancing academia with family planning and parenthood, as well as retirement planning, are given just as much space as collegial exchange on equal footing. I offer guidance, reflection, and practical input for next steps—on the path to a professorship and beyond.

The HABIL-Peer-Colloquium™ is conceived as a multidimensional educational space in which the mathetic attitude plays a central role – with the aim of fostering individual self-efficacy and shaping sustainable, long-term educational pathways.

HABIL-Peer-
Colloquium™

7/2026 – 7/2028; Kennung 002

Make use of my expertise

When I started my own journey toward a professorship, there was no one to guide me the way. I had to painstakingly gather all the information myself—without a compass, without a map. Based on this experience, in 2024 I began organizing an event for colleagues that closes exactly this gap: the HABIL-Peer-Colloquium™.

My goal is to strategically support academic careers—with clarity, structure, and mutual respect. I have already assisted several researchers on their journeys—one colleague I successfully coached to a professorship within a year.

A career in academia is like a mountain hike: if you don't plan your route in advance, you risk detours, uncertainty—or missing the summit. In the HABIL-Peer-Colloquium™, you will have the opportunity to approach your “tour planning” thoroughly: with reflection spaces, impulses, peer exchange, and my individual guidance.
