Winter Placement

When the snow starts falling, please remember these guidelines to ensure collection on your service days.
Always have your cart(s) curbside the night before or no later than 6:00am to ensure collection.
It is your responsibility to make sure all snow is removed so that we can safely, and properly service your home.

DIY Clean container

For odor:

Use all-purpose cleaner, baking soda, bleach, or vinegar and dish soap. Add cleaner to container carefully, scrub, and spray out with outdoor hose.

For stuck on bottom residue:

Pour hot soapy water in the container and let it soak for bottom residue.

Make sure that you let the trash can dry completely. If you don't then you will have created a new breeding ground for germs and smells, because of the moistness.

Notifications

Natural Christmas trees are scheduled to be removed the weeks of January 5th, 2026 and January 12th, 2026.

More information will come out in December

Bows, decorations, ribbon, and wrapping paper should be bagged and placed in your trash container.

MINNESOTA LEGISLATURE REQUIRED DISCLOSURE: You may be responsible for any liability that results from contamination at a facility where your waste has been deposited. Minnesota believes that its waste management systems provide substantially more financial and environmental protection than depositing waste in landfills in other states. Managing your waste in Minnesota may minimize your potential liability.
