

WHAT MAKES THIS FEATURE STAND OUT

Unlike legacy systems that require exact incident times, manual entry, or multiple tools, RideView DVR delivers:

Real-Time Transparency

Know exactly where your request stands at every step.

Unified Workflow

Preview and request happen in one seamless flow, without switching interfaces.

Custom Clip Options

Select the duration, resolution, and camera view that best suit your needs.

RIDEVIEW

DVR TIME LAPSE

Smarter Automation

Timestamp and trip data populate automatically, reducing friction and errors.

Visual Time-Lapse Preview

Quickly scan hours of footage to locate incidents—no exact timestamp needed.

Always-On Access

Request footage even during active trips or vehicle downtime.

BUSINESS IMPACT

RideView DVR makes it feel like the footage finds you, not the other way around.

Faster Incident Response

Locate critical footage in minutes, not hours.

Reduced Frustration

One streamlined UI for both time-lapse and regular video requests.

Complete Visibility

Always know the status of your video requests.

Eliminate Guesswork

Visual timeline scanning removes the need for exact timestamps.

Better Exoneration

Quick access to high-resolution footage when you need proof.

Operational Continuity

Retrieve footage even during ongoing trips or when vehicles are off.
