

Automated Triaging

From Thousands of Videos to Actionable Insights.

AI-powered solution that sifts through all your videos and highlights only the ones that need your attention, so you can stop sifting and start solving.

WHY IT MATTERS

Fleets generate thousands of safety videos daily. Manually reviewing each one is inefficient and unsustainable, and often leads to:

Delayed and inconsistent coaching

Low adoption of video telematics platforms

Missed critical events

Increased accident risk and liability

KEY BENEFITS

LightMetrics' AI-powered Automated Triaging eliminates the noise. It highlights only the most critical events that require your immediate attention.

Beyond Static Configurations

Unlike traditional systems, where fleets define risky behaviors (such as drowsiness or distraction) that overwhelm the system with excessive events, our AI intelligently filters to display only data that truly requires coaching.

Video-Verified Events

Focuses only on events with available video footage, ensuring every flagged event has corresponding visual evidence.

Clear Visibility

Automated vs. manual coaching events are clearly labeled in your Fleet Portal for easy tracking.

Severity-Based Filtering

Highlights high-risk events based on event severity and your custom fleet-defined configurations.

Cost-Effective Intelligence

Eliminates the need for expensive human review services, making advanced safety insights accessible and sustainable for fleets of all sizes.

BUSINESS IMPACT

No more wasting time digging through mountains of videos – AI does the heavy lifting so your team can focus on what matters.

1

Time Savings

Eliminate hours of manual video review each week.

2

Never Miss Critical Events

AI ensures no high-risk behaviors go unnoticed.

3

Faster Coaching

Focus on action, not administration.

4

Better Safety Outcomes

Address critical behaviors quickly and reliably.

5

Data-Driven Approach

Move beyond "what catches the eye" to systematic risk identification.

Integration

Seamless integration with existing video telematics infrastructure.

Configuration

Fully customizable to match your fleet's specific safety priorities.

Scalability

Handles thousands of videos daily across fleets of any size.
