

Smart Link

Enabling All-in-One
Fleet Intelligence

Unlock real-time vehicle diagnostics and ELD-ready data from any MiTAC dashcam – no additional telematics hardware required.

The Challenge and Our Solution

Separate telematics devices add hardware & connectivity costs

No unified view of vehicle health and driver behavior

Existing dashcams are standalone video telematics devices

ELD compliance demands dedicated hardware

All-in-one device replaces the need for separate dashcam+dongle

Streams live CAN data to RideView cloud backend

All existing MiTAC devices compatible with Smart Link Cable

Delivers all ELD-mandated fields on existing MiTAC dashcams

Why choose Smart Link

Reduce Total Cost

Eliminate separate telematics hardware and duplicate data subscriptions

Instant ELD Compliance

All mandated ELD fields streamed from your existing MiTAC dashcam

No Rip-and-Replace

Plug-and-play with your current MiTAC dashcam – no new hardware

Fuel & Idling Intelligence

Monitor fuel efficiency and idling to cut operating costs across the fleet

Proactive Maintenance

DTC codes pre-emptively surface fault alerts before breakdowns

Open API Access

CAN data delivered in real-time via Kafka through the RideView platform
