

ULTRAFLO-C

Capillary Blood Collection System

With Pierceable Cap

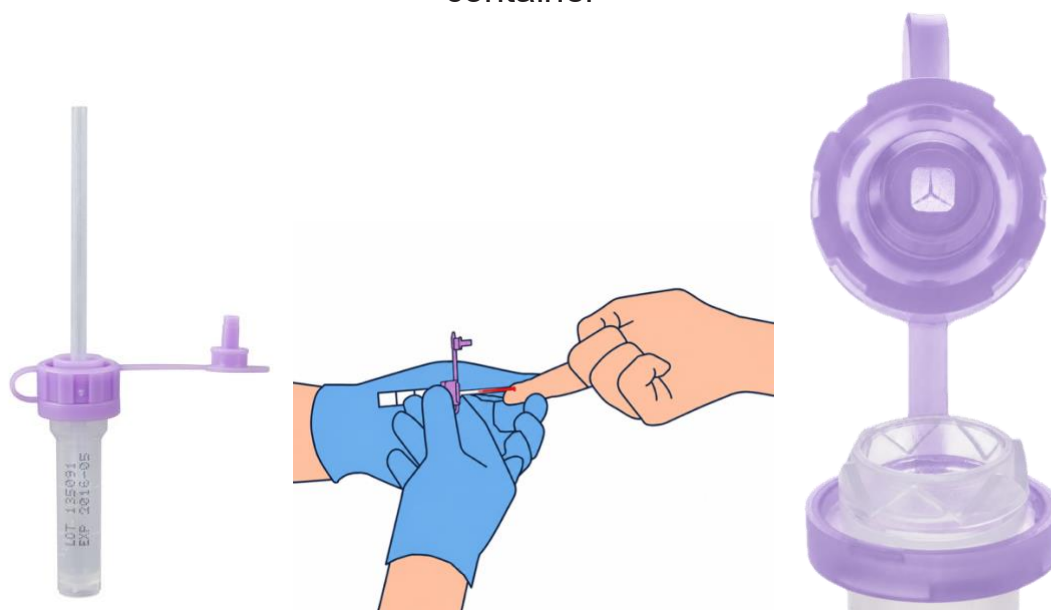

The ideal combination of controlled blood collection and sample container to avoid sample loss or contamination

Exact measurement and stabilization of the required amount of blood via integrated end-to-end plastic capillary coated with anti-coagulant

Reduction of the infection risk thanks to unbreakable plastic capillaries

“Mercedes star” pierceable cap reduces exposure and allows for automated sampling

Clear marking of expiry date and production batch on each sample container
