Corporate travel packs for growth amid global flux

Cost pressures push firms towards tighter, tech-led travel management

GULVEEN AULAKH & AKSHARA SRIVASTAVA
New Delhi, 1 April

Corporate travel is set to become a focus area for travel majors in the coming months, as leisure travel may feel some impact if the West Asian crisis persists, triggering a cascade of higher travel costs, particularly airfares for outbound travel.

While domestic corporate travel may get a leg up, companies are looking to drive greater efficiency in travel spending amid the possibility of rising operating costs due to global factors.

"Modern corporates are targeting travel optimisation. This does not mean cutting costs by asking employees to travel less, but extracting more value within the same budget," said Raj Rishi Singh, chief marketing officer and chief business officer — corporate, flights and Gulf Cooperation Council at MakeMyTrip. The company clocked gross bookings of more than \$1 billion in 2025 across its corporate platforms — Quest2Travel, myBiz, and Happay — underscoring the segment's potential.

The Indian corporate travel market accounts for nearly 30 per cent of the overall travel industry, making it a critical component. An IMARC report pegs the market size at \$44.61 billion in 2025, with projections to reach \$81.54 billion by 2034, growing at a compound annual growth rate of 6.93 per cent from 2026 to 2034.

Corporate earnings for the quarter ended December held up, with double-digit growth for the fourth consecutive quarter, according to a Motilal Oswal report. Even as the West Asian crisis unfolds, the brokerage expects earnings to stay healthy.

A billion dollar switch

- As airfare and travel costs swell, leisure travel has taken a backseat
- Firms are going for travel optimisation — experiencing value within budget
- Corporate travel market segment constitute almost 30% of the travel industry
- Market size projected to reach \$81.54 billion by 2034, with CAGR of 6.93% from 2026-2034
- Travel aggregators are ensuring digital tools to help corporate houses drive efficiency

"There is a clear relationship between business performance and corporate travel demand. When companies see stronger earnings and expansion opportunities, travel demand typically rises," said Vinod Kumar Sah, chief technology officer and cofounder, CoTrav.

According to the Global Business Travel Association, India's

business travel spending reached an estimated \$38.3 billion in 2024, making it the eighth-largest market globally. This growth is supported by improvements in aviation infrastructure, expansion of hotel inventory, and the rise of the meetings, incentives, conferences, and exhibitions (MICE) segment.

"As organisations scale, travel becomes essential for client engagement, project execution, internal collaboration, and market expansion — making it a core business function rather than a discretionary expense," Sah added.

Sector watchers said organisations are becoming more focused on travel efficiency, cost optimisation, and employee experience, driving greater adoption of structured, technology-enabled travel management solutions.

Sah concurred that more companies are adopting new-age solutions to improve compliance and reduce leakage, pushing travel service providers to keep pace. "We are also focusing on digital tools to align with this demand," he said.

Domestic corporate travel remains a strong and expanding segment, supported by economic growth, increased business activity, and the rise of multi-city operations across industries. As demand picks up, travel aggregators are honing their focus on the segment, offering value-driven services and digital tools to help companies improve efficiency.

"We are at the forefront of this shift and are keen to grow our share in the corporate segment. What sets us apart is our integrated stack — from bookings via myBiz to expense management through Happay — giving corporates end-to-end visibility and control over travel spend on a single platform," Singh added.

FIRST TIME IN 50 YEARS, NASA TO LAUNCH ASTRONAUTS TO MOON

Nasa's Artemis II mission was to lift off from Kennedy Space Center in Florida on Wednesday at 22:24 GMT (3:54 am IST). Artemis II will be on 10-day flight carrying four astronauts around the moon. This launch attempt, the mission's first, comes after delays in February and March caused by technical issues with the rocket, including hydrogen leaks and a problem with helium flow

CBSE launches AI curriculum for classes 3-8

AUHONA MUKHERJEE
New Delhi, 1 April

The Ministry of Education and the Central Board of Secondary Education (CBSE) on Wednesday launched the curriculum on Computational Thinking (CT) and Artificial Intelligence (AI) for students of classes three to eight.

The ministry released three documents comprising a curriculum, a teachers' handbook and learning material. The content will be made available online on the CBSE's website. "The curriculum for classes nine and ten will be unveiled next year by the NCERT. For classes 11 and 12, it will be introduced as an optional subject. We will phase out the topics related to traditional computer science once the curriculum for classes nine and ten are released," said Rahul Singh, chairman at the CBSE.

The CBSE constituted an expert committee in October 2025 to develop a curriculum on Computational

Thinking and Artificial Intelligence for school students. The panel, chaired by Karthik Raman of Indian Institute of Technology Madras, was tasked with designing age-appropriate learning modules, teaching resources and assessment methods for students from classes three to eight.

Its mandate was to introduce foundational computational thinking skills early in school education and create a structured pathway for AI learning in line with the goals of the National Education Policy 2020 and the National Curriculum Framework for School Education 2023.

Singh said that the committee met nine times in the span of two to three months since its formation.

"The design for the curriculum was shared with the NCERT and based on their comments, the curriculum was modified and the books started being prepared. We want AI to be demystified and the curriculum will be revised as per feedback from schools," Singh added.

Blinkit rolls out services inside Mumbai airport

Quick commerce (qcom) platform Blinkit has launched its services inside Chhatrapati Shivaji Maharaj International Airport, Mumbai, marking its entry into high-footfall transit hubs.

"Today we're launching Blinkit inside the Mumbai Airport Specifically Terminal 2 (domestic departures) of Chhatrapati Shivaji Maharaj International Airport," Albinder

Dhindsa, the platform's chief executive officer said in a social media post. As part of the collaboration, air travellers will be able to order from a selection of more than 2,500 products on the Blinkit app. The Mumbai airport is the first airport in the world to have a service of this kind.

"The orders will be delivered within the terminal by a dedicated team of walkers," Dhindsa mentioned. **UDISHA SRIVASTAVA**
