# AN INTRODUCTION TO CHESNEYS

Chesneys is internationally recognised as the leading brand in the Luxury heating sector, offering its clients a uniquely diverse range of beautifully designed, technically innovative products that are kind to the environment.

A family run business, for over 40 years our success has been founded on an uncompromising commitment to our core values. Outstanding craftsmanship, intelligent engineering and innovative design have been the cornerstones of this success, coupled with a passion to deliver service levels of the highest standard.

The Chesneys portfolio includes an extensive collection of contemporary and period fire surrounds and accessories, an industry leading range of wood burning and gas stoves, decorative gas and electric fires, and the most technically advanced and environmentally friendly range of Bioethanol fires that are available.

Our range runs to many hundreds of different products and designs, which can be viewed on our website, but in the following pages we will show some of the most popular designs within each of our product categories.

I hope that you will find plenty to enjoy.

Nicholas Chesney

Sales Director

# FIREPLACES

---

Chesneys offer the widest range of luxury fireplaces to be found anywhere. Every fireplace embodies the precise masonry skills, craftsmanship and finest natural materials, which are the elements required for a fireplace of true quality.

The Collection includes contemporary designs, historical designs and a unique range of rare and wonderful materials sourced from quarries throughout the world.

We can also undertake bespoke manufacture of any design with over forty years of expertise in this specialist field.

# THE CONTEMPORARY COLLECTION

Our contemporary collection combines simple architectural form with a range of beautiful natural materials, offering an imaginative alternative to traditional fireplace design.

THE MANHATTAN CLASSIC Shown here in Lilac marble

THE DEVONSHIRE Shown here in limestone

### THE BURLINGTON

A timeless design carved from limestone. With its simple geometric lines and classical proportions, it will give architectural interest and a sense of scale to both modern and traditional interiors.

## THE MILO

Fabricated in beautiful Grigio Gold marble, The Milo is a design that will lend sophistication to any room.

## THE SCARPA

Worked from solid block marble, shown here in Nero Marquina marble, the Scarpa is a robust design of architectural form with minimal mouldings which include inward facing concave shaped mouldings that require precise masonry skills. Equally at home in a period or contemporary interior.

## THE WALTON

Seen here in Volakas marble, the Walton is a minimalist design of striking form with finely executed architectural detail.

## THE HISTORICAL COLLECTION

Ranging from Queen Anne to the Edwardian period and including both British and Continental designs, the fireplaces in our Historical Collection are exact copies of antique originals, recognised by conservation bodies, designers and architects for their accuracy and authenticity.

THE VICTORIAN CORBEL Shown here in Volakas marble

THE MARSEILLES An 18th century Provincial French design in Bathstone

### THE CHICHESTER

A mid 18th century chimneypiece with moulded dog leg jambs, a repeat frieze carved with stiff leaf acanthus and a corniced shelf featuring a tier of crisp egg and dart carving. Shown here in Portland stone with optional patinated antique finish.

### THE LANGLEY

A handsome Regency chimneypiece in statuary marble with fielded panels to the jambs and frieze, the former elegantly tapering downwards from corner blockings with crisply carved rosettes.

## THE SPECIAL MATERIALS COLLECTION

In response to the growing popularity of exciting and unusual materials in the design of fireplaces, we have assembled a selection of beautiful and unusual materials to form our Special Materials Collection.

### BRECCIA VIOLA MARBLE

The Milo features a strong bolection moulding and is shown here in richly coloured Breccia Viola

### CALACATTA VAGLI MARBLE

One of the most popular designs in our Contemporary Collection, the Manhattan is shown here in richly patterned Calacatta Vagli.

### BRECCIA MEDICEA MARBLE

The Chelsea is a minimalist design which re-invents the traditional bolection moulding and is shown here in stunning Breccia Medicea marble.

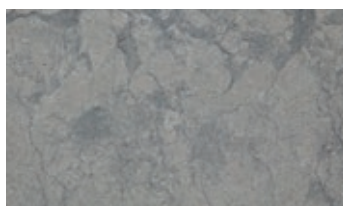

### ARABESCATO MARBLE

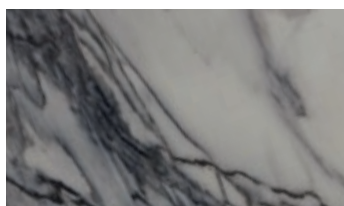

The Alderney is a robust bolection moulding with mantel shelf and is shown here in beautifully figured Arabescato marble.

# WOOD STOVE COLLECTION

---

We believe that a wood burning stove should be an energy efficient source of heat and provide an attractive focal point in any room.

We offer two distinct ranges of stoves; a sleek minimalist aesthetic in our Contemporary Collection, alongside our Heritage Collection which includes both traditional and retro designs.

Our stoves deliver efficiency ratings that are as high as 86% and all are approved for installation in smoke free zones with emissions so low that they exceed the required levels by up to ten times.

You can't buy a more beautiful, efficient and clean stove.

## THE SOLSTICE

CONTEMPORARY COLLECTION  
PEDESTAL WOOD STOVE

## CONTEMPORARY STOVE COLLECTION

THE SANCTUARY 5WS in Sage Green

We wanted our new Contemporary Collection to be minimalist, embracing a 'less is more' ethos, but ensuring that wherever detail appears it is meticulously conceptualised and executed. Driven by an entirely new combustion system that is highly efficient and clean, our aim has been to successfully combine functionality with aesthetics.

## HERITAGE STOVE COLLECTION

THE SALISBURY 5WS MK3

We launched our Heritage range two decades ago in collaboration with The National Trust. We developed designs that had strong visual and aesthetic appeal reflecting Traditional, Classical and Modernist influences. Today this range is as popular as ever and now benefits from the recent introduction of new combustion technology which places it at the forefront of the stove industry.

# GAS STOVES AND FIRES

---

Chesneys also offer a collection of gas stoves and decorative effect gas fires for grates and fire baskets. These are as close to a real fire as you can get, offering the beauty and warmth of a real fire with a convenient flick of a switch.

Beautifully crafted, the new generation of gas stove from Chesneys strikes the perfect balance between elegance and efficiency. The performance of the stoves is outstanding with an efficiency rating of 84% and a heat output that ranges from 2.5kW on a low setting to 5.3kW on a high setting. Providing a stove receives an annual service it is protected by a 5 year warranty. A Chesneys gas stove can be combined with a traditional or contemporary fire surround or installed as a freestanding unit within a room. Chesneys most popular designs of wood stove are all available as gas stoves.

The range of gas effect fires includes both open fronted and glass fronted gas fires. A Chesneys gas effect fire is not just about engineering and performance. Every fire that we design has to also meet the most challenging aesthetic criteria and achieve the most realistic appearance possible.

THE SERENDIPITY  
SLIDE CONTROL  
GAS STOVE

Our new generation of gas stoves are outstanding in their design, build and performance using a single slide control lever which is not linked to a power source, and which allows the user to turn the appliance on and off and easily adjust the flame height.

GLASS FRONTED  
GAS FIRES

**THE MAESTRO 60 DRU GAS FIRE**

The highly efficient Maestro 60 glass fronted gas log fire is shown with The Art Deco inspired Miami surround in Nero Marquina.

## COAL AND LOG EFFECT GAS FIRES

Coal and log effect gas fires offer uniquely captivating and realistic looking fires which can be used with Chesneys extensive range of fire baskets and register grates. Chesneys coal effect gas fire is shown in a Soho fire basket with spherical dogs inside a Burlington limestone surround with modern steel slips.

# BIOETHANOL FIRES

---

Clean and easy to install as no chimney is required, the Chesneys bioethanol range is a great alternative to wood or gas, burning fuel extracted from plants in a 100% energy efficient process. The only requirement is that an electricity supply is available.

As an increasing number of people acknowledge the need to protect the environment, bioethanol fires and stoves are growing rapidly in their popularity and use.

## BIOETHANOL STOVES

Unique features include a patented combustion process that allows a burn time of 11 hours without the need to re-fuel, automatic ignition, full remote control, an odourless burn and a heat output of 3.5 Kw.

The Salisbury 5 Bioethanol Stove shown with the Classic Victorian in Cabouca Limestone.

THE ALCHEMY RB1000 MK4

### BIOETHANOL LINEAR BURNERS

These are a perfect design feature for a contemporary interior and can be installed in a number of ways. They are available in two sizes measuring 700mm or 1000mm in length both of which produce mesmerising flame patterns.

THE ALCHEMY FB18 LOG FIRE

## BIOETHANOL FIRES FOR BASKETS

Chesneys offer the most technically advanced and sophisticated Bioethanol fires that are available. These are available for use with a selection of free standing baskets and fire dogs.

# ELECTRIC FIRES

---

In some locations it isn't practical to install a working fire using solid fuel, gas or Bioethanol. Chesneys range of Olympus electric fires provides an effective and attractive solution.

Ultrasonic technology is used to create a fine mist that is illuminated to produce unbelievably realistic flames and smoke. Installation simply requires an adjacent electric supply with no requirement for a working flue or heatproof fire chamber.

## OLYMPUS ELECTRIC FIRE

Every living room should have a fireplace at its heart and in many modern buildings and period conversions achieving this can be a challenge. Chesneys can provide an effective and attractive solution with our range of electric fire baskets. Shown with Soho firebasket for dogs in the Devonshire.

# FIRE DOGS, BASKETS AND REGISTER GRATES

Chesneys offer a wide selection of both period and contemporary fire baskets and fire dogs. A selection of register grates and hand forged andirons are also available. All of these can house a solid fuel or gas effect fire and a number can also be used with a Bioethanol or electric fire.

## CONTEMPORARY FIRE BASKETS

A range of stunning contemporary fire baskets and fire dogs, all of which can house a real or gas fire and in some cases an Alchemy Bioethanol fire or an Electric fire.
