Oracle OCI Managed Services

DataStrike's expert team specializes in managing and optimizing Oracle Cloud Infrastructure (OCI). With a deep understanding of OCI's capabilities, DataStrike can provide tailored solutions for maximum efficiency, security, and performance, offering 24x7x365 support and guidance.

Oracle OCI Expertise

- In-depth knowledge of OCI's comprehensive cloud service offerings: IaaS, PaaS, ExaCS, DR, backup and recovery, and multi-cloud integration.
- Expertise in deploying, managing, and optimizing infrastructure and platform resources across these domains.
- Extensive experience as an MSP for OCI clients, offering comprehensive services covering management, optimization, and tailored support.

Oracle OCI Support and Administration

- Integration of various OCI services, workflow automation, and orchestration of cloud resources for increased efficiency.
- Implementation and maintenance of robust security measures, including access controls, encryption, and compliance with security best practices.
- Proven track record in optimizing OCI resources for improved system performance and cost-effectiveness.
- Management and maintenance of underlying infrastructure within OCI: virtual machines, storage, and networking components.
- Designing resilient high availability architectures for system reliability.
- Continuous monitoring of OCI services, resources for optimal performance, and prompt issue resolution.

Cloud Engagement Summary

- Migration of Oracle workloads to OCI
- Migration of Oracle EBS and Peoplesoft from on-premises to OCI
- Migrations between Cloud Providers
- Architecting Hybrid On-Premises and Cloud-Based Solutions
- Cloud-Based DR and Backup Solutions
- Oracle Exadata to ExaCS Migrations
- Migration of Oracle Engineered systems to OCI IaaS
- Migration of Oracle Middleware components to Oracle IaaS and PaaS solutions
- MSP services to manage OCI environments
- Oracle License and Cloud Spend Optimization
