

# LINUX IS THE FOUNDATION. WE MAKE SURE IT HOLDS.

Most organizations don't have a dedicated Linux administrator — the job gets inherited by a DBA or cloud engineer with a spare hour. Infrastructure looks stable until it isn't. DataStrike provides senior, onshore Linux engineers under one fractional contract.

## SERVICE INCLUDES

- ✓ **OS administration & lifecycle**  
Patching, upgrades, kernel and lifecycle planning.
- ✓ **Security hardening & CIS compliance**  
Benchmark enforcement, vulnerability remediation.
- ✓ **Performance & capacity**  
Monitoring, tuning, and resource forecasting.
- ✓ **Access & log management**  
IAM, auditing, centralized logging
- ✓ **Database & cloud VMs**  
SQL Server, Oracle, Postgres, MySQL, EC2, Azure, OCI, GDP.
- ✓ **Containers & AI workloads**  
Docker, Kubernetes, CUDA, model-serving runtimes.

## WHY DATASTRIKE

-  **Onshore by Principle**  
U.S.-based engineers. No offshore handoffs at 2am.
-  **Senior Talent Only**  
Your environment is not a training ground.
-  **One Contract, Full Estate**  
Pairs with database, cloud, and data platform services.
-  **Fractional & Flexible**  
Right-sized coverage. Scale by quarter, month-to-month.
-  **AI Workload Ready**  
GPU servers, inference endpoints, model pipelines.
