

— JOINT OFFER

AI DISCOVERY SPRINT

From ambition to a plan you can act on.

Condense months of internal conversations into a focused, 1–2 week strategic sprint to pinpoint one high-value AI opportunity, understand what it takes to make it real, and define the simplest path forward. Built for leadership teams that want answers, fast.

1–2 WKS

PRIORITIZED TO START

ZERO LOCK-IN

NO BUILD COMMITMENT

— HOW IT RUNS

THREE SESSIONS. ONE CLEAR ANSWER.

We do the heavy lifting between sessions, so your team only joins the conversations that move things forward.

SESSION 01

WEEK 1

KICKOFF & INTERVIEWS

● **90–120 minutes**

We align on goals and get a clear picture of where you stand today: top pain areas, current AI and Copilot usage, and any compliance constraints.

● **Who's in the room**

Your exec sponsor, plus one or two people who live in the workflow that causes the most friction.

SESSION 02

3–5 DAYS LATER

USE-CASE WORKSHOP

● **Half-day, facilitated**

We score candidate use cases on value, feasibility, and speed to impact, then agree on the one to start with.

● **One feasibility check**

IT, security, or your data lead joins for a single session so the plan reflects what's actually possible.

SESSION 03

WEEK 2

EXECUTIVE READOUT

● **60–90 minutes**

Leadership gets the verdict, the 90-day roadmap, and a clear recommendation on what to do next.

● **A written pack**

You leave with the exec deck and a written summary, so there's nothing left to chase down afterward.

Go / no-go verdict
EXEC READOUT DECK

We needed fast, reliable data engineering support — and Brainforge delivered. They spun up quickly, laid strong foundations, and brought in the right people at every stage, from infra to modeling. Onboarding was seamless and they scaled with our needs. Highly recommend.

Mitchell Wright, Head of Growth bolt.new by StackBlitz

— WHAT YOU GET

SIX DELIVERABLES YOU'LL ACTUALLY USE.

Each one helps you make a decision. You leave with the verdict, a clear read on readiness, and the plan to act on it.

01 Current-State Brief

Where you stand today: top pain areas, current AI and Copilot usage, and the compliance constraints any rollout has to respect.

03 Governance & Operating Model

A draft model for how AI gets owned, reviewed, and run safely in production, built for leadership teams that want structure in place.

05 Exec Readout Deck + Summary

An executive readout deck plus a written summary, with the verdict and the plan ready to share with your leadership team.

02 Prioritized Use-Case Backlog

A ranked list of AI use cases scored on business value, feasibility, and speed to impact, with one recommended as the best place to start.

04 90-Day Roadmap

A practical plan to move the selected AI use case forward: the right people, the right sequence, and a timeline you can actually hit.

06 Phase 1 SOW Outline OPTIONAL

A Phase 1 build outline with estimated effort and pricing guidance, so the path from decision to execution is already defined.

— THE PARTNERSHIP

ONE TEAM FOR STRATEGY AND DELIVERY.

Two firms, one accountable team. Brainforge owns the AI strategy; DataStrike runs it in production.

BRAINFORGE AI STRATEGY & WORKFLOW DESIGN

Finds where AI creates real value, picks the use cases worth pursuing, and turns strategy into solutions that ship. An insights firm on real results.

Uttam Kumaran
BRAINFORGE · CHIEF EXECUTIVE OFFICER

DATASTRIKE DATA PLATFORMS & MANAGED SERVICES

Runs the data platforms, cloud environments, and governance that keep AI working reliably in production. 100% onshore. Senior practitioners only.

Corey Beck
DATASTRIKE · VP OF SERVICE DELIVERY

Who you'll work with. No juniors and no handoffs. The same senior practitioners stay with you across all three sessions, each owning a clear part of the engagement.

Uttam Kumaran
Leads kickoff and the final readout

Senior AI / data facilitator
Runs the use-case workshop and builds the backlog

Analyst
Captures session notes and writes the pack

NAMED ON THE SOW PER ENGAGEMENT.

— READY WHEN YOU ARE

FIND WHERE AI CREATES REAL VALUE.

Start with a 30-minute scoping call. We'll confirm fit and map your sprint — fixed scope, no lock-in.

— Fixed 1–2 week timeline — One prioritized use case to start — No build commitment
