AI Innovation Lab

Start with a problem. Leave with a working system.

Northeastern University's **AI Innovation Lab** shapes custom AI-powered systems built around the challenges your organization faces. Project engagements are scoped based on the problem, so the solutions delivered are uniquely yours. Capable student consultant teams are assigned to every project.

100%	40+	3 - 6
ON-TIME DELIVERY	PROJECTS COMPLETED	AVERAGE TEAM SIZE

Custom engagements include

- **Flexibility:** 6 weeks to 6 months+
- **Discovery:** no blueprint required
- **Expertise:** university specialists
- **Coordination:** on us, not you
- **Guidance:** faculty on every team
- **Delivery:** a system you keep

The process

1. **Introductory conversation**
2. **Collaborative mapping**
3. **Deliberate team selection**
4. **Structured project kickoff**

Client success stories

Via Separations

Inventory audits were once manual efforts, now it takes <40 minutes in the new system. Multistep manufacturing plans calculate instantly too.

> **"The consultants' technical rigor and clear communication elevated every interaction."**
>
> Mary Sherman, Director of Technical Operations

Verizon

Delivered low cost visibility on customer sentiment across 10+ competitors and 6+ data sources, with AI briefings and daily anomaly alerting.

> **"When you bring in students with faculty guiding them, the world's your oyster."**
>
> Paul Sullivan, Vice President of Northeast Wireline Operations
