

IOSH Managing Safely - Refresher

About this course:

This programme doesn't just refresh existing knowledge, it takes understanding further, with a strong focus on leadership skills and building a positive health and safety culture.

It is designed to refresh managers' and supervisors' awareness of their responsibilities for workplace safety and health, while showing how an effective safety management system can influence, control, and monitor risks to drive improvements.

The course also includes **decision-making simulations**, giving managers the chance to practise handling real-life scenarios and see first-hand how their choices can affect both performance and organisational culture.

Course content:

- Module 1 - Thinking back
- Module 2 - Leadership
- Module 3 - Plan
- Module 4 - Do
- Module 5 - Check
- Module 6 - Act

At the end of this course, you will be able to:

- Describe the key reasons to manage safety and health in the workplace
- Recall safety and health key terms and their definitions
- Describe the benefits and key parts of an effective safety and health management system
- Identify how the law can affect safety and health in the workplace
- Describe how to assess, reduce and control risk in the workplace
- Describe the principles that underpin good safety and health performance

Course assessment:

The assessment consists of one online multiple-choice examination consisting of 21 interactive questions, and the pass mark is 62.5% with two attempts to pass. Retakes, if needed, are included.

Course Duration: 7-8 hrs
