

We're Obsessed with Inventory

Automated Inventory
and Asset Management

Storeroom Logix is obsessed with connecting the supply chain and changing how parts and assets are controlled.

Objectives

Reduce
Stockouts

Optimize
Inventory

Lower Cost
per Watt

The SRX Solution

Storeroom Logix is a cloud-based, SaaS platform providing turnkey Supply Chain and Inventory Management solutions.

With over 270 software features, supplemented with a connected equipment package, SRX provides a game changing Inventory Management solution.

SRX Solution highlights:

- Advanced cloud-based software
- Connected equipment solution
- Supplier and Customer Integration
- Advanced algorithms for optimal inventory management

The SRX Solution

SRX
software is
amazing

SRX Software

Storeroom Logix software (SRX) is a 100% cloud-based solution built on the AWS infrastructure.

SRX contains over 270 software features

Our software runs our equipment – all connected in the cloud

Actionable Dashboards and Reporting like you have never seen before

Automatic on-hand inventory adjustments and replenishment requests

Key features include the following:

- Customer portal
- Mobile apps
- Checkout Software
- Real-time visibility and control of all data, anywhere, at any time, by anyone
- Serial number traceability from supplier to machine
- Asset Management

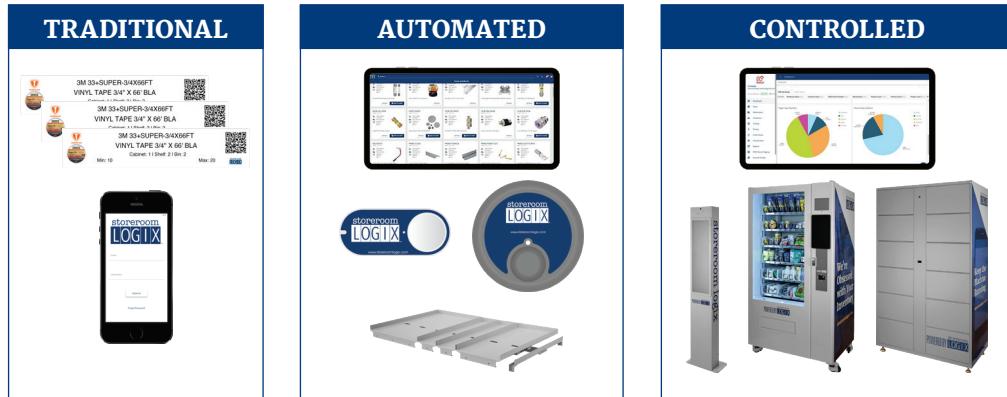

“

SRX
Equipment
helps us
control our
inventory

SRX Equipment

Storeroom Logix equipment supplements SRX software to provide a complete and customizable Inventory and Asset Management Solution.

Lower Cost per Watt by reducing consumption, shrinkage, and stockouts. Know who, what, when, and where.

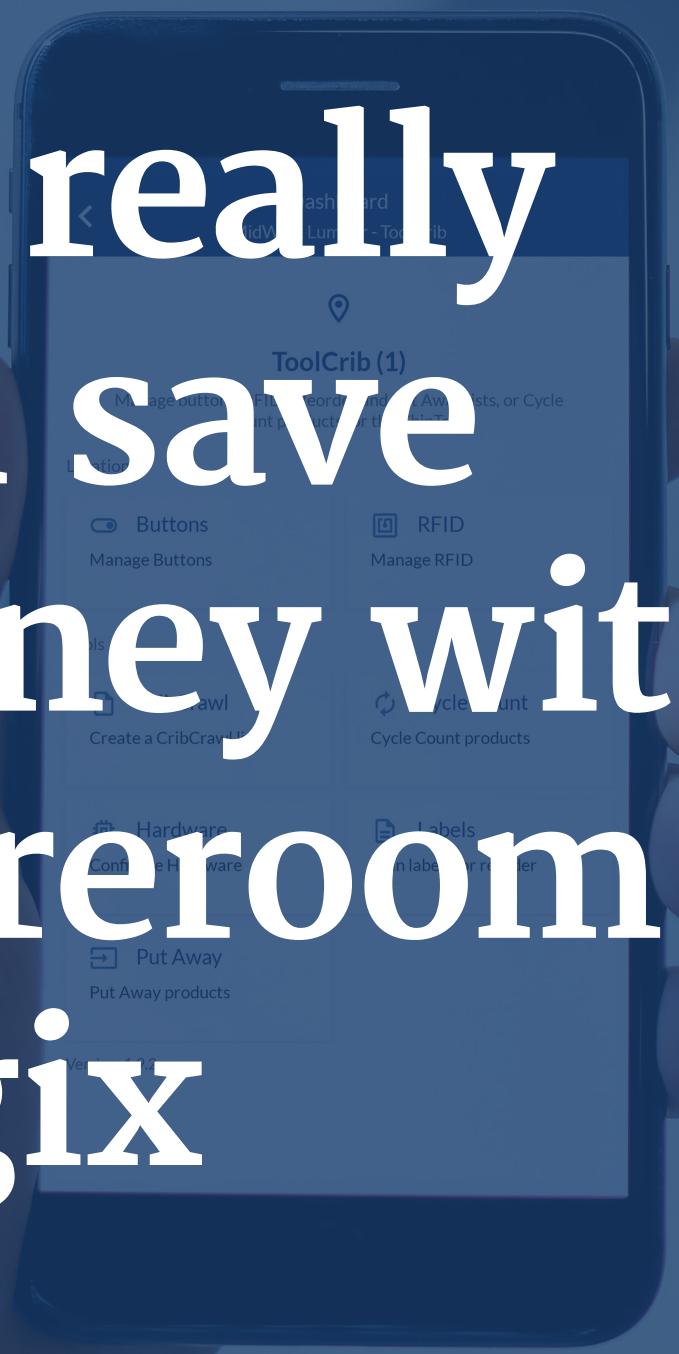

SRX equipment connects seamlessly to SRX software

The image is divided into six vertical columns, each representing a different type of SRX equipment:

- Labels:** Scan on and off line for time savings and accuracy. Includes a smartphone showing the app and three examples of printed labels with QR codes.
- Order buttons:** Instant replenishment at the click of a button. Includes a 'storeroom LOGIX' button and a circular sensor device.
- Smart Shelves:** Automate the audit and replenishment process. Includes a metal shelving unit and a screenshot of a computer screen showing a list of inventory items.
- Vending Machines:** Reduce usage and shrinkage. Includes a vending machine with a display screen.
- Lockers:** Control access and trace usage. Includes a large grey locker unit.
- RFID:** Automate inventory usage, levels, and replenishment. Includes a tall grey vertical locker unit.

money with
Storeroom
Logix

Return on Investment

Storeroom Logix is obsessed with your inventory and helping you reduce cost. Your Return on Investment (ROI) will be high and your Payback will be quick when you invest in SRX.

Lower Cost per Watt by reducing stockouts, consumption, shrinkage, labor and carrying costs

Stockouts

Reduce stockouts by having the right part when needed

Consumption

Reduce consumption by controlling access and usage

Shrinkage

Reduce shrinkage with control, visibility and traceability

Labor

Reduce labor costs by automating manual processes

Carrying Costs

Reduce carrying costs by optimizing inventory levels
