Detail-oriented Sports Statistician with recent experience in play-by-play coverage and live commentary, meticulously documenting every play for accuracy under pressure. Combines this with extensive experience in sales and customer service, achieving an average annual sales increase of 17% and acquiring over 100 new credit accounts. Pursuing a Computer Science and Full-Stack Software Engineering degree, bringing a unique blend of analytical skills, dedication to improvement, and a strong foundation in technical problem-solving to enhance data integrity and user experience.

## WORK EXPERIENCE

### Sports Statistician

09/2024 – Present

Genius Sports, Tulsa

- Managed play-by-play coverage for entire games, meticulously documenting every play and penalty.
- Collaborated with the Game Administrator to ensure accurate statistical recording while providing live commentary.
- Attained continuous performance improvement, earning the opportunity to travel for game coverage and receiving recognition for work during the OU vs. Alabama matchup.
- Sharpened attention to detail under pressure, enhancing accuracy in high-paced situations.

### General Manager

08/2011 – 02/2022

Sherwin Williams, Brookside-Bixby-Broken Arrow LL

- Delivered exceptional customer service, achieving an average annual sales increase of 17%.
- Executed a successful account acquisition initiative, securing over 100 new credit accounts within one year through effective relationship-building and innovative marketing strategies.
- Conducted an average of 50 sales calls weekly and over 50 face-to-face meetings with new and existing customers to bolster sales within targeted market segments.
- Cultivated leadership capabilities through active participation in diverse training sessions.

## EDUCATION

### Computer Science and Full-Stack Software Engineering - Computer Science and Specialization

01/2023 –

04/2026

Atlas School, Tulsa

- Completed a rigorous peer and project-based software engineering program in Tulsa, Oklahoma, encompassing foundational software engineering concepts and advancing to comprehensive Full Stack Web Development, including both Front-End and Back-End engineering.

## PROJECTS

### InciSight

- InciSight is an AI-powered beauty ingredient scanner that helps people understand what's really in their products by letting them search items or scan labels, compare formulas, and get clear explanations tailored to their skin needs and preferences. Its mission is to make ingredient lists feel less overwhelming and give people more confidence in choosing products that are safer, better matched to them, and easier to trust.
