

PRESS RELEASE

Global partnership: Travelsoft and Gekko Group join forces to expand global hotel distribution

Paris, December 2nd, 2025

Travelsoft, a provider of technology solutions for the travel industry, and Gekko Group, a leading player in B2B hotel distribution, announce the launch of a strategic partnership.

The agreement enables the integration of the hotel inventories of **Teldar Travel** and **Infinite**, two brands of the Gekko Group, into **Travelgate** and **Travel Compositor**, two platforms within the Travelsoft portfolio.

A partnership that strengthens access to global hotel content

Thanks to this integration, travel agencies, tour operators, and distributors can now access a broader, competitive, and secure hotel inventory in real time.

- **Teldar Travel** provides a global inventory of more than **2 million accommodations**. The brand stands out through its multilingual **24/7 customer service** and its operational quality-control process: each hotel is contacted 48 hours before guests' arrival to prevent on-site issues. This approach significantly reduces the incident rate to **below 0.1%**. A field sales team also supports clients booking through Travelgate and Travel Compositor.
- **Infinite**, on its side, is built on a portfolio of **directly contracted hotels** designed to ensure reliability and competitiveness. This inventory includes partnerships with major international hotel groups such as **Accor, Hilton, Jumeirah, Louvre Hotels, Shangri-La, Best Western, and Fairmont**, further strengthening the depth and quality of its directly contracted content.

A shared ambition to support travel distributors

Travelsoft brings together leading travel technology platforms—including **Travel Compositor, Travelgate, Orchestra, Traffics** and others—designed to simplify, automate, and scale the distribution of tourism inventories.

The integration of Teldar Travel and Infinite aligns with this objective of enabling seamless, direct connection between suppliers and distributors.

“We are delighted to strengthen the visibility and distribution of our brands Teldar Travel and Infinite through this partnership. Travelsoft is a key technology player in the industry, and this collaboration enhances our ability to meet the needs of travel professionals,” says **Fabrice Perdoncini, CEO of Gekko Group**.

Christian Sabbagh, Founder & CEO of Travelsoft, adds, “Integrating Teldar Travel and Infinite content into Travelgate and Travel Compositor reflects our commitment to offering more choice and added value to our customers. This partnership reinforces Travelsoft’s central role within the travel technology ecosystem.”

About Gekko Group

Gekko Group is a Travel Tech company specializing in both leisure and corporate hotel distribution, as well as in the development of tailor-made digital solutions for travel professionals.

Through its brands — **Hcorpo, Teldar Travel, Infinite, Miles Attack and Gekko Tech** — the group offers powerful, customizable tools for hotel market access, connectivity and loyalty programs.

A trusted partner for travel agencies, TMCs and companies of all sizes, Gekko simplifies hotel booking, optimizes B2B distribution and enhances the traveler experience.

Backed by the Accor Group and driven by a strong culture of innovation, Gekko aims to become a global reference in hotel booking, providing high-value, flexible and scalable solutions adapted to a rapidly evolving industry.

About Travelsoft

Travelsoft is a reference Travel SaaS group founded in Paris in 2000. Its technologies power more than €40 billion in bookings each year for travel players in over 90 countries.

The company focuses on addressing core technological issues by automating sourcing, packaging, booking, and connectivity. Travelsoft platforms simplify the process of buying and selling travel products around the world, enabling travel companies to scale efficiently and focus on growth.

The group employs c. 700 travel technology experts and unites ten platforms, including **Atcore, Orchestra, Tigerbay, Traffics, Travel Compositor, Travel Connection Technology, Travelgate, Travelsoft Pay, Travelsoft Services, and Eventiz** (including the recently acquired Travolution).
