DEVICE TRUST

BEYOND IDENTITY

Precise access control to enforce device security compliance

Device Security Assurance
Ensure device security compliance for every OS with real-time and scheduled posture queries

Simple Admin Experience
Unified policy engine with an intuitive user interface for easy centralized access control

Risk-Based Access Policies
Enforce precise risk based access policies using device posture and integrated security telemetry

Secure Access for Unmanaged Devices
Single lightweight authenticator app for visibility and control on every device accessing resources

KNOW FOR SURE THAT

- All devices accessing corporate resources (including BYOD, contractor, consultant, and partner devices) are trusted and secure.

- All devices are compliant with your security and regulatory policies, with enforcement in place for any risk or deviation.

- Devices in your inventory are not at risk for specific CVE or any vulnerable versions

Total devices
There are 247 devices in your device inventory.

247
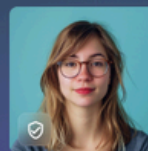

Device Info

Host name	Lizas-PC
Serial number	7VK0PQ9Z0D
OS Version	Windows 11.3
Authenticator Connection ID	02a425f2-720d46f1-a9d0-63a45377a027
Last Response	Awaiting response
Misconfigurations	Antivirus Not Enabled Disk Encryption Not Enabled
Note	Liza's PC
