delay and the continued development or release of a project on the roadmaps is at the sole discretion of SAP.

Agenda

- SAP Integration Suite – Overview and Strategy

- SAP Integration Suite – Recent Innovations

- SAP Integration Suite – Road Map

- Key Take-Aways, Q & A

- Links for Further Information

Overview
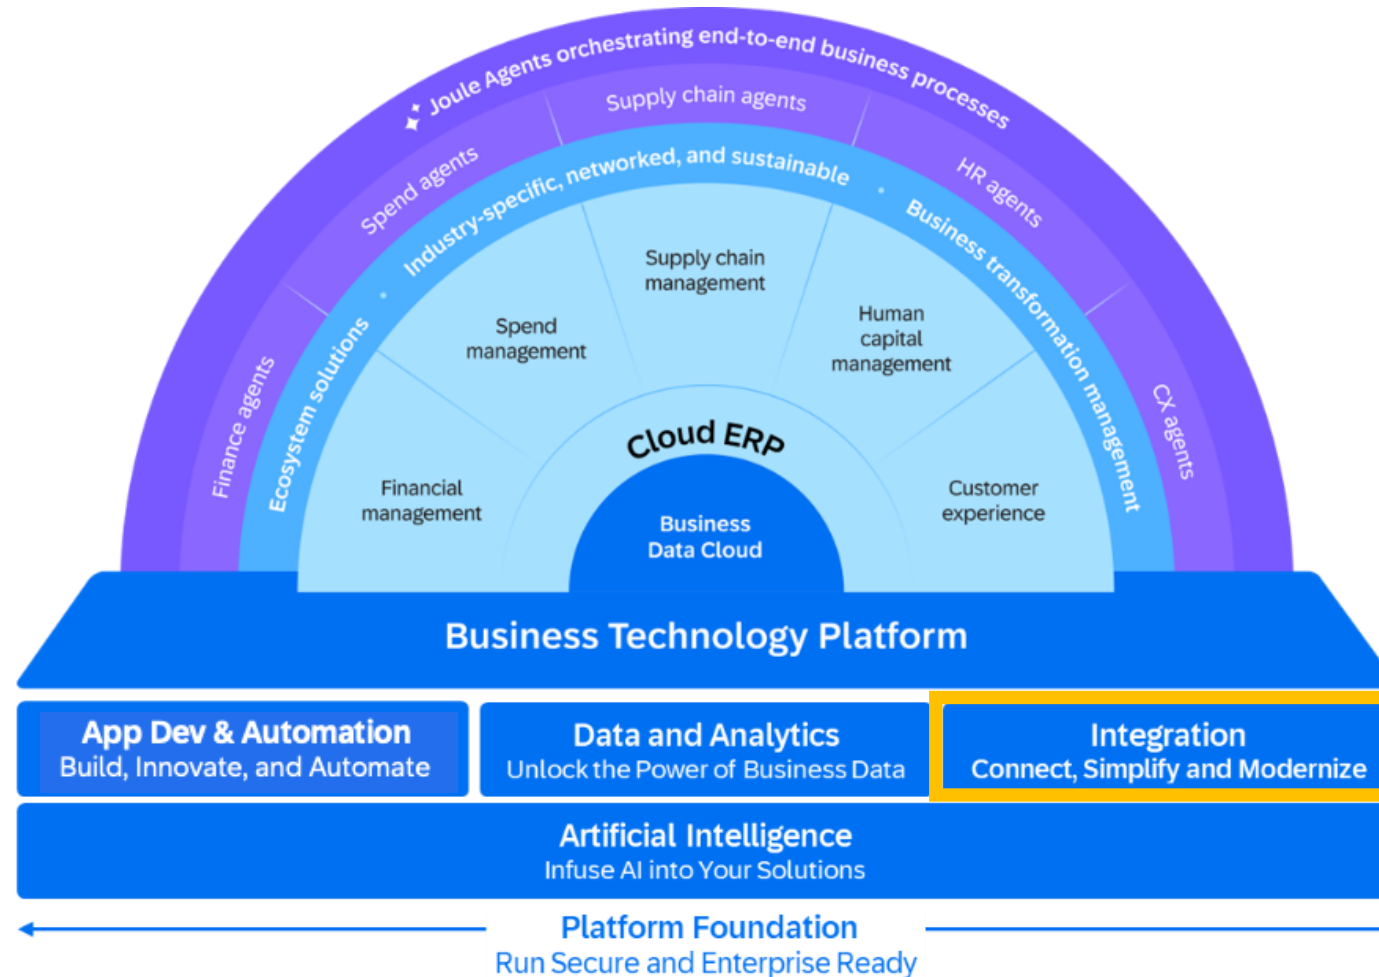

Integration is assuming even greater importance as a **strategic priority** and **key-enabler** of AI-driven and automated business.

SAP Business Suite

The future "target state" of enterprise management

1 **AI-First:** Leverage Business AI and Business Data Cloud across our entire portfolio

2 **Suite-First:** Innovate, build, and run our SAP Suite on our Business Technology Platform

SAP Integration Suite
Connecting "all" process and data across the value chain

Business processes

| Recruit to retire | Lead to cash | Source to pay | Plan to fulfill | Acquire to decommission | Idea to market | And more··· |

Pre-packaged Integration Content

Third-party Apps

aws | workday
Microsoft
servicenow

SAP Apps

SAP Integration Suite

Holistic capabilities for development & operational excellence

Integration strategy definition & governance

Low-code integration experience

Modern API-centric and Event-driven integrations
AI gateway, and hybrid orchestration

Security & Governance

Migration from legacy platforms and modernization

Monitoring & Operations

powered by AI

| Hyperscaler environments (public cloud) | Hybrid integrations (private landscapes) |

B2B Trading Partners

ANSI X12, EDIFACT, GS1, etc.

Governments

USA, Great Britain, India, Australia, etc.

AI Agents

| Consolidate | Third-party integration platforms | Modernize | SAP software Legacy Integration |

Top 10 reasons to choose SAP´s Integration Suite as a comprehensive enterprise-wide integration platform

1 **Versatile and enterprise-grade integration platform** covering all integration styles and patterns: A2A/B2B/B2G, APIs, events, digital integration hub, digital ecosystems

2 **Proven prebuilt integrations**, APIs, events, domain models to jump-start integration projects

3 **Rich set of connectivity options** and standard adapters for A2A and B2B/B2G integration, 250+ **connectors** for SAP and non-SAP integrations

4 **Vendor-managed multi-cloud service in major hyperscalers** as well as customer-managed service providing flexibility to run integrations across multiple environments including private landscapes

5 Simplify the process of **business partners collaboration** with the **power of artificial intelligence**

6 Benefit from SAP's **continued innovation and long-term commitment** to simplify and accelerate enterprise integration

7 **Strong focus on enterprise-grade security** such as data isolation, multitenancy, content encryption and signing, single sign-on, and secure on-premise connectivity

8 Share and learn from a **community and partner ecosystem**

9 Offers **real-time event streaming** that enables an enterprise-wide EDA strategy with flexible broker deployments satisfying high scalability and resilience

10 **SAP Integration Solution Advisory Methodology** with strong customer focus to make our customers run better

SAP recognized as a Leader in the 2025 Gartner® Magic Quadrant™ for the 5th consecutive time.

SAP is positioned as the vendor with the highest ability to execute in the report.

With SAP Integration Suite, you can Integrate with one solution to accelerate productivity across SAP and non-SAP landscapes.

This graphic was published by Gartner, Inc. as part of a larger research document and should be evaluated in the context of the entire document. The Gartner document is available upon request from SAP here.

Figure 1: Magic Quadrant for Integration Platform as a Service
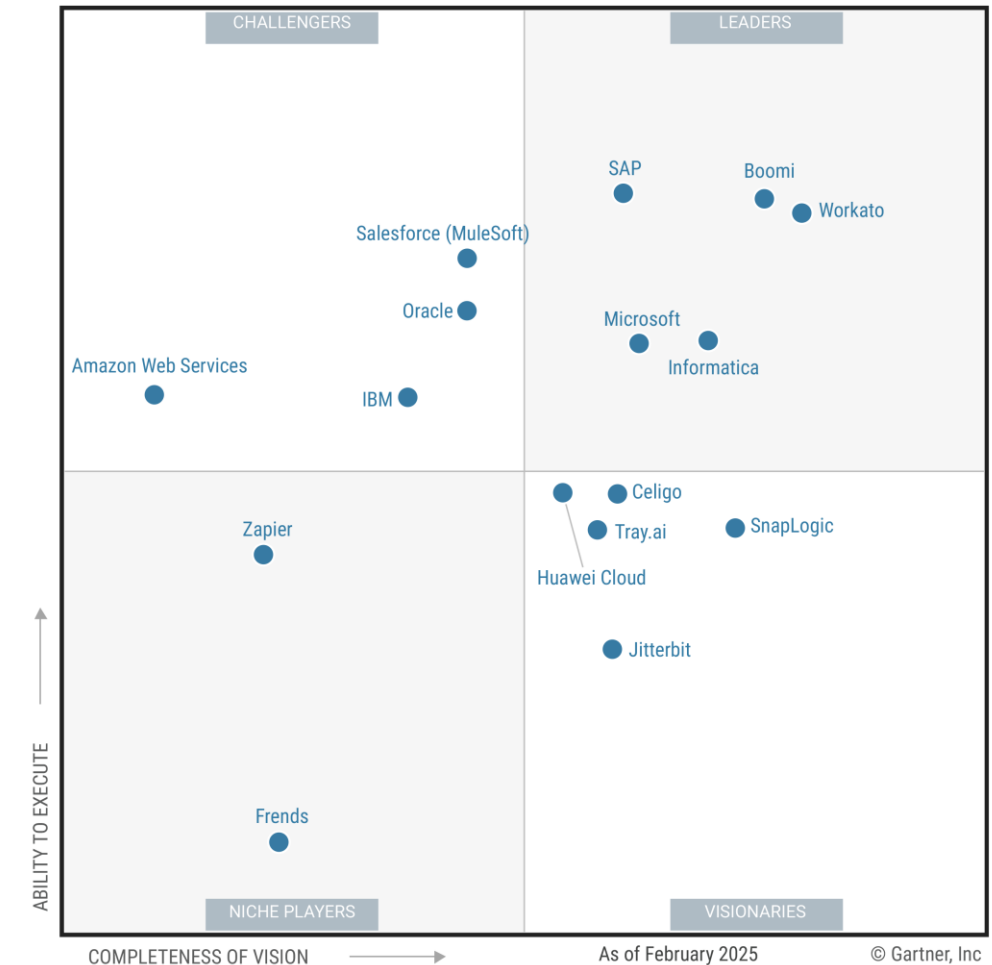

Choose leading cloud Integration software and services

SAP recognized as a Leader in the 2024 IDC B2B Marketscape™

"SAP Integration Suite has extensive industry-specific coverage, with prebuilt templates or patterns … accelerating adoption."[1]

IDC MarketScape Worldwide Business-to-Business Middleware Vendor Assessment

IDC MarketScape Worldwide Business-to-Business Middleware, 2024
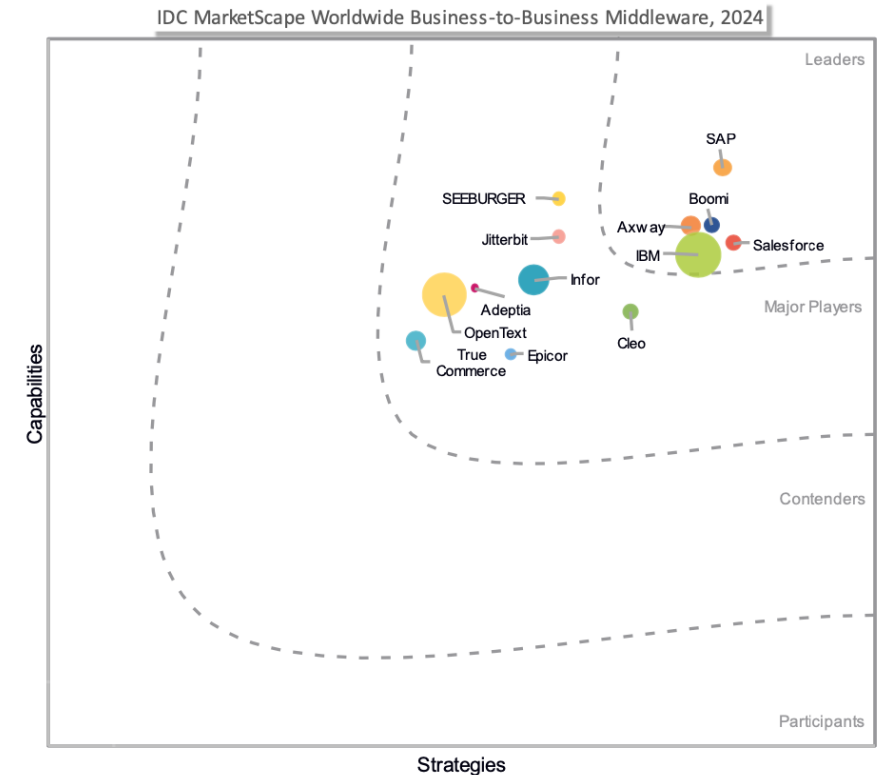

Source: IDC, 2024

IDC MarketScape vendor analysis model is designed to provide an overview of the competitive fitness of ICT suppliers in a given market. The research methodology utilizes a rigorous scoring methodology based on both qualitative and quantitative criteria that results in a single graphical illustration of each vendor's position within a given market. The Capabilities score measures vendor product, go-to-market and business execution in the short-term. The Strategy score measures alignment of vendor strategies with customer requirements in a 3-5-year timeframe. Vendor market share is represented by the size of the icons.

SAP Integration Suite – Bringing Business AI ecosystem together

Trusted solution to scale our customer's business

SAP Integration Suite

Example customer & partner success in numbers

Endress+Hauser — People for Process Automation

Up to 10x
Increased project speed and reduced costs.

€85 million
annual digital net sales via B2B cloud integration incl. SAP and non-SAP systems

TOYOTA

50%
Reduction in integration costs for SAP and 3rd party system integration using SAP Integration Suite

thyssenkrupp

20%
increase in revenue from the e-commerce portal.

12,800
customers using the business-to-business portal.

DuluxGroup

150+
Integration flows migrated (from Neo environment to Cloud Foundry) and tested in development, validated in quality and deployed into production

4 month
Project period for migrating and testing all integration Flows from the NEO environment into the new cloud foundry landscape across all three tiers

toom — Respekt, wer's selber macht.

50%
Cost reduction by sunsetting legacy integration technology

2x
Faster implementation of integration scenarios across SAP and 3rd party applications

kemira

363
interfaces migrated to SAP Integration Suite

50%
less time taken to set up a new interface than previously

natura

15.2%
Increase in sales consultant productivity in one year

33%
Fewer carbon emissions through improvements across supply-chain, logistics, and production processes incl. SAP and non-SAP systems

Harrods

40%
reduction in TCO across the integration landscape incl. SAP and non-SAP systems

30%
shorter process times, freeing staff to focus on other tasks.

ELKJOP

5 million
Messages processed on average daily through SAP Integration Suite integrating SAP and non-SAP systems

50 million
API calls per month through the API Management capability in SAP Integration Suite

Check out some recent innovations

Key innovations delivered since January 2025
Complete list of innovations documented in [release notes](#)

Artificial Intelligence

Joule-based discovery and reuse of artifacts from SAP Business Accelerator Hub

More comprehensive integration flow with more mediation steps created via GenAI

API traffic prediction for usage and trends

SAP Business Accelerator Hub introduces new theme for filtering of AI content

Consolidated landing page to provide one view and central activation control for all AI features

Business Accelerators

Search and discovery of B2B artifacts (e. g. interfaces, mappings, Trading Partner Agreements) published on SAP Business Accelerator Hub

Search and discovery of SAP Business Data Cloud content on SAP Business Accelerator Hub

Additional non-SAP connectivity: AI, BigCommerce, DocuSign, Google BigQuery, Google Pub / Sub, IBM MQ (JMS). MS OneDrive, MS Teams, Shopify, …

Data Space Integration to connect to industry networks

Migration & Modernization

New clean core recommendations to modernize existing interfaces with respective APIs (SOAP, ODATA, REST) and business events

ABAP proxy generation

Automatic creation of B2B interfaces based on payload data

Introduction of more fine granular, predefined roles for B2B sensitive payload data visibility

Access policies for Edge Integration Cell

API-Centric & Event-Driven Integrations

Developer Hub as single catalogue source for search and discovery for APIs and events

New events for SAP SuccessFactors published on SAP Business Accelerator Hub

Event add-on to forward custom events from SAP ERP, SAP S/4HANA to SAP Integration Suite eventing framework for 3rd party distribution
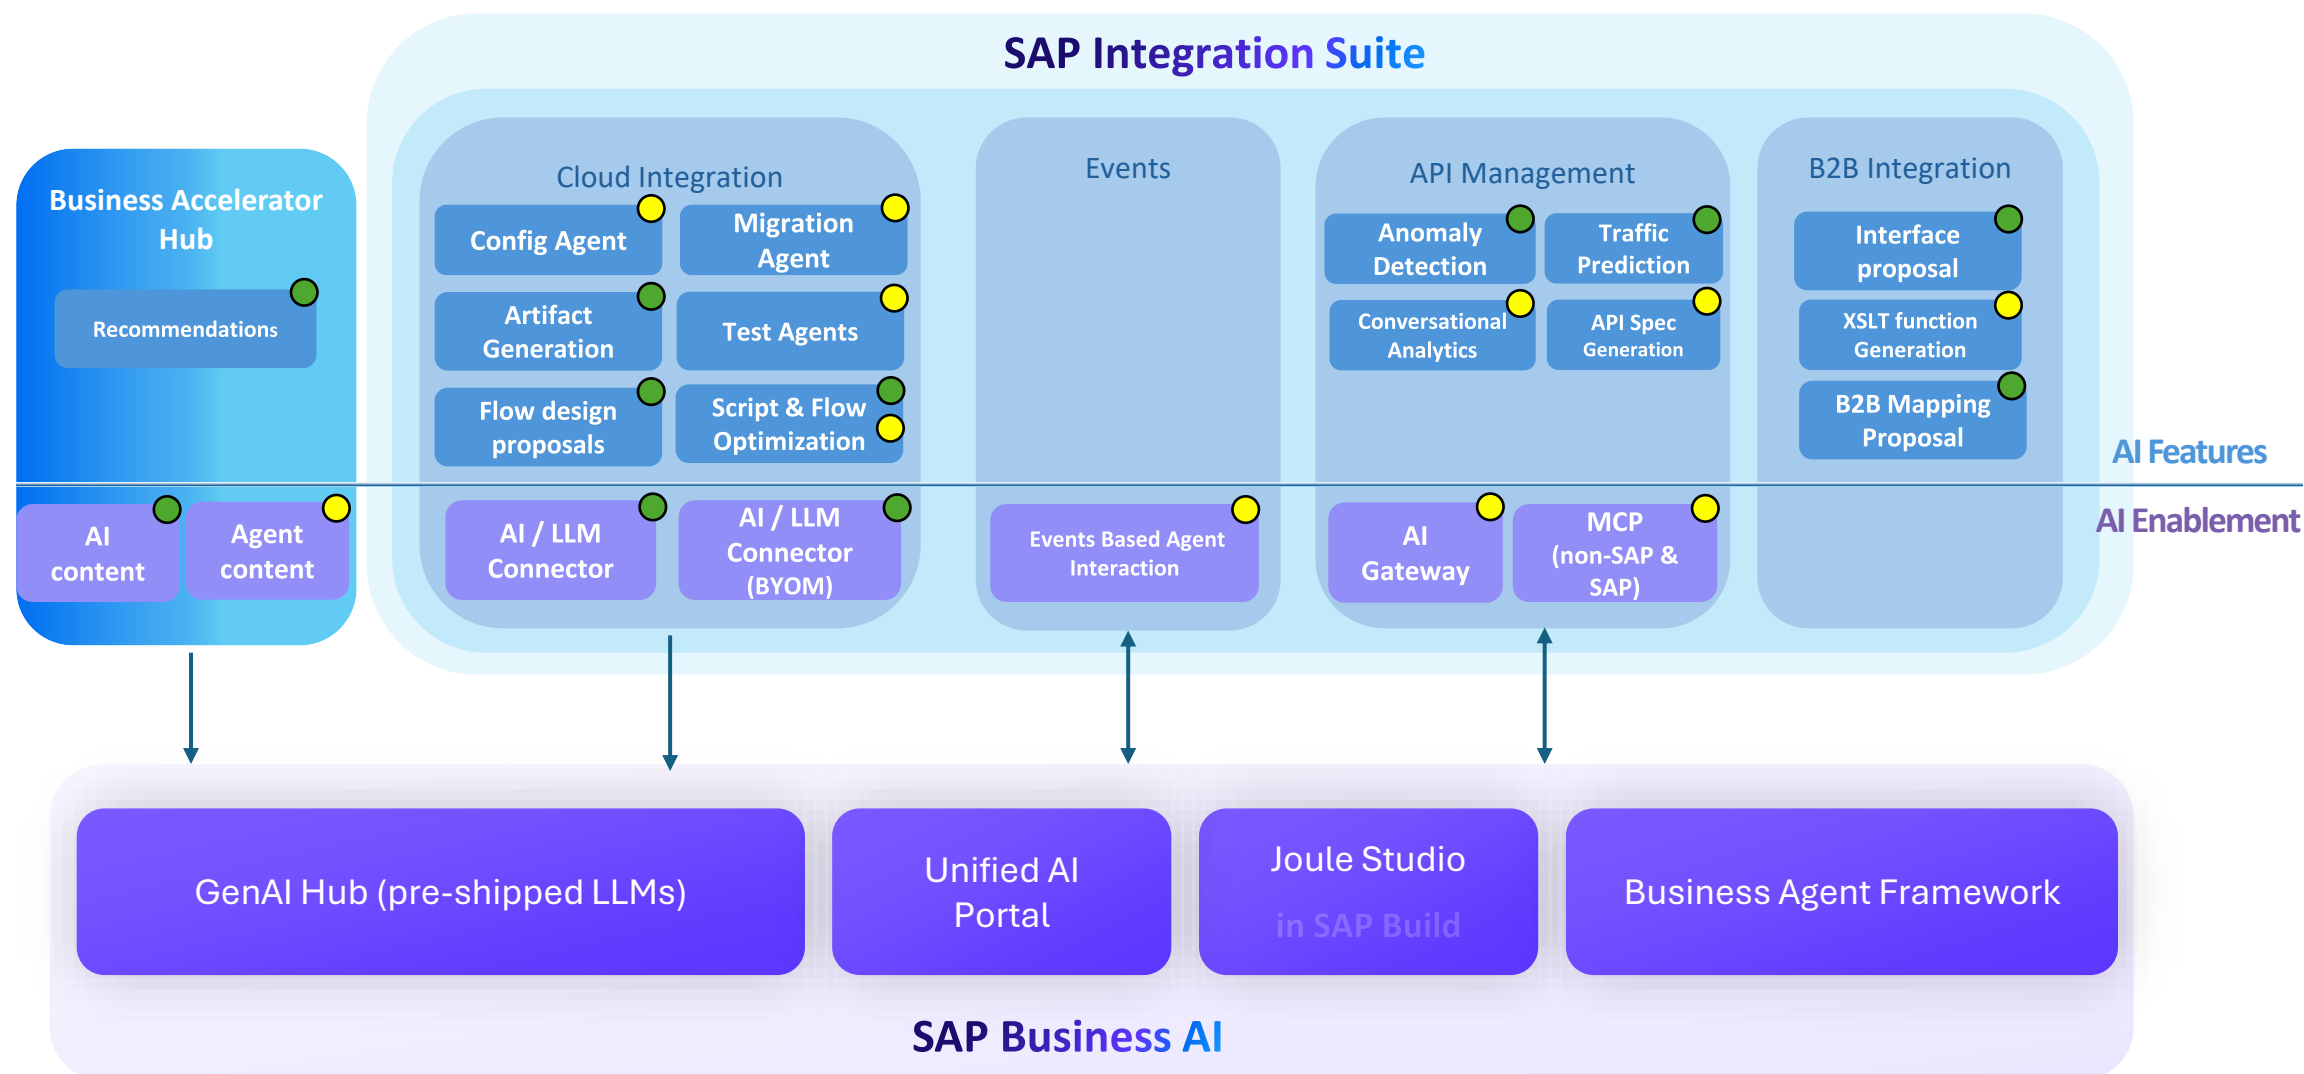

Comprehensive set of connectivity options

250+ connectors to accelerate integration development

Open spec connectors

- IBM MQ (REST, MQ) **New!**
- AMQP, AS2, AS4, JMS,
- HTTP, HTTPS (incl. REST), SOAP (1.x, RM)
- OData V2 & V4
- Advanced Event Mesh, Kafka
- FTP(S), SFTP
- JDBC (incl. IBM DB2, Microsoft SQL, ODBC, Oracle, PostgreSQL, SAP ASE, SAP HANA)
- Mail (SMTP, IMAP, POP3)
- IDoc, RFC (Sender & Receiver), XI **New!**
- Data Store, LDAP
- And more

Connectors to SAP & third-party apps

- Ariba, SuccessFactors (OData, SOAP), MDI
- AWS (S3, SQS, SNS, SWF), AWS Bridge, AWS Dynamo DB
- Microsoft Azure Storage (Blob, Queue, Table), Microsoft Microsoft SharePoint, Azure DB
- Salesforce, ServiceNow, Workday
- Dropbox, Slack, Splunk,
- Elster, Facebook, X, Anaplan, HubSpot, Jira, NetSuite ERP, Snowflake

- BigCommerce
- DocuSign,
- Google BigQuery, Google Pub/Sub, Google Cloud
- LeanIX
- Microsoft OneDrive, Microsoft Teams
- Salesforce Pub/Sub, Shopify

New!

Full list of
adapters by SAP

Full list of
open connectors

Open connectors to third-party apps

- Cloud storage
- Collaboration
- CRM
- ECommerce
- ERP
- eSignature
- HCM
- Field services
- Finance
- Help desk
- Messaging
- Payments
- Social
- And more

Expanded migration & modernization support when transitioning to the cloud

Modernization recommendations
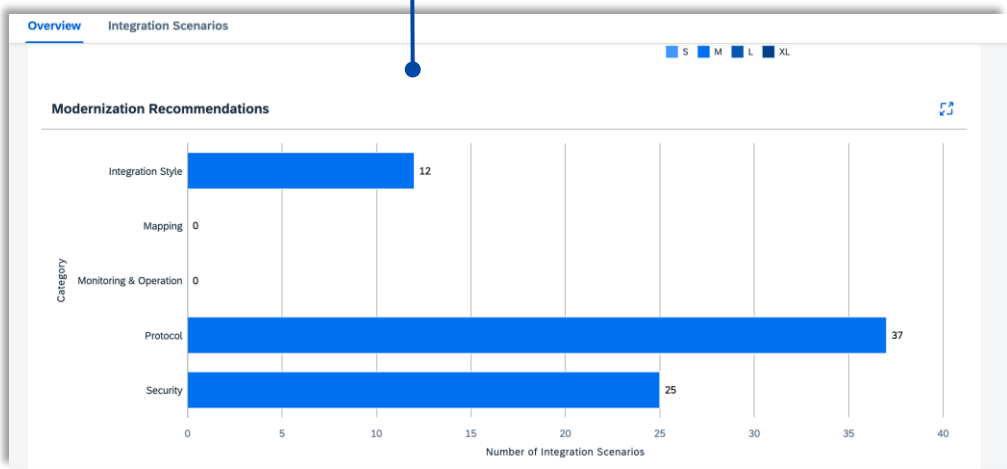

Support of Exactly-Once-In-Order scenario (EOIO)

ABAP proxy generation

Support of dual-stack integration scenarios

Road Map

Customer collaborations help to drive product decisions
SAP Integration Suite

SAP Customer Influence
- ~1300 customers & partners engaged
- Requesting features, 90% considered for roadmap
- SAP review within planning process

Feedback through **SAP Business Accelerator Hub**
- Report bugs or provide feedback
- Request content such as APIs, integrations, events (points to SAP Customer Influence)

Customer Engagement Initiative
- Sneak peek into product vision, ideas, and prototypes & share early feedback
- Topics: SAP PO migration, Edge Integration Cell, (Gen)AI, API-centric integration, B2B, event-driven integration, and more

---

We appreciate your feedback ✕

Feedback | **Request Content**

Choose a product you would like to request content from:

- ☐ SAP S/4HANA Cloud   ☐ SAP S/4HANA   ☐ SAP Customer Experience
- ☑ SAP Business Technology Platform   ☐ SAP SuccessFactors   ☐ SAP Ariba
- ☐ SAP Concur   ☐ SAP Fieldglass   ☐ SAP Business ByDesign
- ☐ SAP Integrated Business Planning for Supply Chain

Product Name	Customer Influence Session
SAP Business Technology Platform	SAP Integration Suite
	SAP Process Automation with SAP Workflow Management & intelligent RPA
	SAP BTP Foundation
	SAP BTP ABAP Environment

FEEDBACK

Future Investment Areas for SAP Integration Suite until Q1 / 2026

Artificial Intelligence

Intelligent, context-aware recommendations for detected API anomalies

XPath & XSLT gen. in MAG editor

Migration of adapter module & Java mappings to Groovy scripts

Agent interaction via MCP (Q2 / 2026)

Joule-based conversational analytics for APIs (Q2 / 2026)

Payload size anomaly identification in API traffic (Q3 / 2026)

Business Accelerators

Connectivity options: File / NFS, Amazon Kinesis, Bamboo, Box, Microsoft (Azure Service Bus, Excel, OneNote, Outlook), MongoDB, OFTP2, Salesforce Service Cloud, Zendesk,, …

Self-service integration content publication from SAP Solution Hub to SAP Store and SAP BAH

Migration & Modernization

Support for mass migration from SAP Process Orchestration to SAP Integration Suite

AI-powered conversion of adapter modules and Java scripts to Groovy scripts

Edge Integration Cell:
- Support of HANA DB & Valkey DB
- Remote OData API access
- Shared Kubernetes cluster with fewer required privileges
- Offline mode support for 48 hours

API-Centric & Event-Driven Integrations

Integration of advanced event mesh for health & scenario monitoring in SAP Cloud ALM and SAP Focused Run

Migration support from SAP Event Mesh and Event Mesh capability to SAP Integration Suite, advanced event mesh

Discovery and publication of advanced event mesh events in the developer hub

SAP Integration Suite – Process Integration
Product road map overview – Key innovations

Recent Innovation	Planned Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

Cloud Integration

- DocuSign, Shopify, Google BigQuery, AI, IBM MQ using JMS protocol – Client Certificate & BigCommerce adapters *
- Generative AI based script optimization **
- Support for Exactly once in order processing functionality
- AI based IFlow generation with mediation steps**

Migration / Customer Evolution*

- Clean-Core modernization recommendations for Idocs & BAPIs
- Message mapping: support for referenced schema to avoid flattening of XML
- Message queue management: move single or selected multiple messages
- Message status overview monitor for large tenants
- ABAP proxy generation from service Interfaces for PI Move customers

Migration / Customer Evolution*

- Supporting dynamic header in XI adapter
- Supporting SOAP fault in XI adapter
- Service Interface artifact creation
- IBM MQ adapter using JMS protocol: connectivity through a cloud connector

Cloud Integration

- Microsoft OneNote, Microsoft Outlook, Microsoft Azure Service Bus, MongoDB, Amazon Kinesis and Box adapters*
- Poll-rich flow step for FTP adapters
- Advanced checks for Groovy scripts in Integration designer

Migration / Customer Evolution*

- Support for parameterized mappings for the adapter type
- Supporting non-XML payloads in XI adapter
- Support for mass migration from Process Orchestration to SAP Integration Suite
- Support for dynamic configuration of adapter types in message mapping UDFs
- Extending and filtering scenario details in the message queue monitor
- JDBC adapter: Support empty string in query

Cloud Integration

- Microsoft Excel, Salesforce service cloud, Zendesk & Bamboo adapters*
- "Where-used" functionality for security materials
- Exposing memory shortages in inspect tool
- Migration Agent: Adapter module & Java mappings to Groovy scripts**
- Integration Flow design validation**

Migration / Customer Evolution*

- Support for acknowledgements in the XI adapter
- Support for VDA standard (flat-file)

Cloud Integration

- Google Drive, Google Sheets, Gmail &Twilio adapters*
- Flat file to XML converter
- Configuration Agent**

1. This is the current state of planning and may be changed by SAP at any time without notice.

* Only with SAP Integration Suite, standard or premium editions
** Only with SAP Integration Suite, premium edition
*** Available with SAP Integration Suite, advanced event mesh

SAP Integration Suite – Process Integration for ground scenarios
Product road map overview – Key innovations

Recent Innovation	Planned Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

Edge Integration Cell*

- Alerting for system monitoring events
- Diagnostics tasks in operation cockpit
- Changing edge lifecycle management local container registry configuration
- Validation policy for OpenAPI specification
- Support for Kubernetes security policies
- Support for the container application platform Google Kubernetes Engine
- Changing edge lifecycle management HTTP proxy configuration
- Disable certificate pinning
- RFC sender and receiver adapter
- Support for Access policies
- Exactly Once In Order (EOIO) support in Java Message Service adapter
- Availability on Alibaba Cloud
- Advance downloading of images for scanning

Edge Integration Cell*

- Custom system monitoring solution
- Local ODATA API access
- Basic authentication using the client ID and client secret
- Shared Kubernetes cluster with fewer required privileges
- Support for Principal propagation
- Support for the SAP HANA DB
- File adapter to send and receive files
- Customer-managed cloud connectors
- Offline mode support for 48 hours

Edge Integration Cell*

- Support for the partner directory
- Automated CI/CD lifecycle integration through APIs
- OFTP2 adapter for exchanging Odette messages
- Downgrade to previous version
- OAuth authentication with the client credentials grant

Edge Integration Cell*

- Disabling message payload access from the cloud
- Scheduled upgrade
- Flat file to XML converter

1. This is the current state of planning and may be changed by SAP at any time without notice.

* Only with SAP Integration Suite, standard or premium editions or CPEA

SAP Integration Suite – B2B Integration and Data Space Integration
Product road map overview – Key innovations

Recent Innovation	Planned Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

Trading Partner Management *

- Cancelation of interchanges
- Manual resend and retry of failed interchanges
- Pass-through interchanges
- Authorization role for displaying B2B payload in B2B monitor
- Flexible configuration of agreement matching using custom keys

Integration Advisor

- New type system xCBL
- Improve mapping proposals in MAG editor
- Support of XSLT 3.0 and XPath 3.1 in XSLT snippets
- Base and overlay mapping
- MIG creation based on multiple payloads

Data Space Integration (GA) *

Trading Partner Management *

- Alerting of failed B2B interchanges
- Version control for trading partner agreements
- Support for the SFTP adapter in Trading Partner Management

Integration Advisor

- Inbound and outbound bulk processing for selected scenarios
- XPath and XSLT generation in MAG editor based on artificial intelligence*
- Read API for B2B monitoring data
- Enabling custom XSLT mapping as a mapping guideline (MAG)

Data Space Integration *

- An add-on to integrate the DSI package with Integration Suite, starter edition

---

Trading Partner Management *

- End-to-end documentation of a trading partner agreement
- Support for cXML type systems in Trading Partner Management
- Native support of message mapping (mmap) in Trading Partner Management

Data Space Integration *

- Multiple connectors for a single tenant
- Bring your own wallet feature

Trading Partner Management *

- API for creating TPM artifacts
- Enable B2B capabilities: TPM & IA in EIC
- Support for VDA standard (flat-file)

Integration Advisor

- Additional XSLT pre- and post-processing steps inside mapping guidelines (MAGs)

Data Space Integration *

- Support of OID4VCI (OpenID for Verifiable Credential Issuance)

---

1. This is the current state of planning and may be changed by SAP at any time without notice.

TPM (Trading Partner Management)
* only with SAP Integration Suite, standard or premium editions or CPEA

SAP Integration Suite – API-led Integration
Product road map overview – Key innovations

Recent Innovation	Planned Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

API Management

- Single-source API and events catalog for developers
- Support for access policies for API artifacts***
- Multiple request-reply policy support for API artifacts ***
- Externalization support for API artifacts***
- Support for reusable API artifacts in Edge Integration Cell***

API Management

- AI-based intelligent recommendations for detected API anomalies**
- External workflow support for API key requisition in Developer Hub*
- XML threat protection policy for XML-based APIs***

API Management

- Discovery and publication of advanced event mesh events in the developer hub*
- Support of exception subprocess for API artifacts***
- Valkey support for Edge Integration Cell***
- JSON Web token verification***

API Management

- Joule-based conversational analytics for APIs**
- Subscription of API products as Agents in developer hub**
- Exposure of APIs as hosted MCP servers for AI agentic use**
- AI-assisted API specification and documentation generation**
- Developer subscription flow for an API artifact***

1. This is the current state of planning and may be changed by SAP at any time without notice.
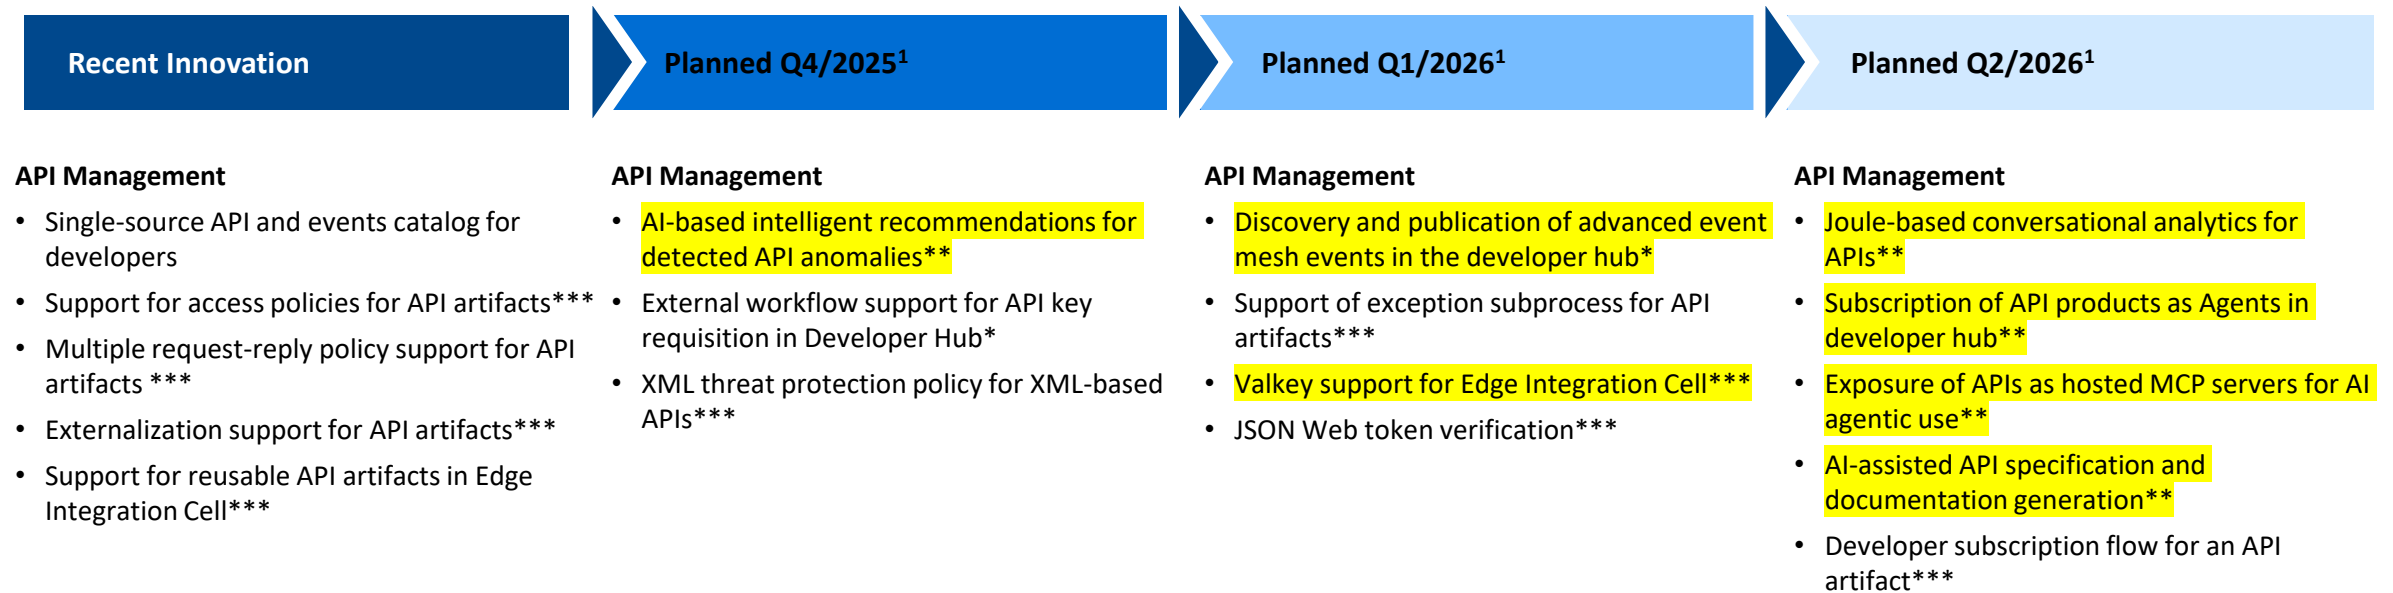

* Only with SAP Integration Suite, standard or premium editions or CPEA
** Only with SAP Integration Suite, premium edition
*** Only for Edge Integration Cell runtime

SAP Integration Suite – Public Content Catalog

Product road map overview – Key innovations

Recent Innovation	Planned Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

SAP Business Accelerator Hub

- Highlighting AI content
- Search and discovery of BDC content & service programming interfaces
- Additional filtering option for CDS views
- Joule copilot-based conversational search and discovery of content

SAP Business Accelerator Hub

- Support for OAS v 3.1
- <mark>Self-service commercial integration content publication from SAP Solution Hub</mark>

SAP Business Accelerator Hub

- Support for AsyncAPI 3.0
- Support for publication of Joule skills and Agents
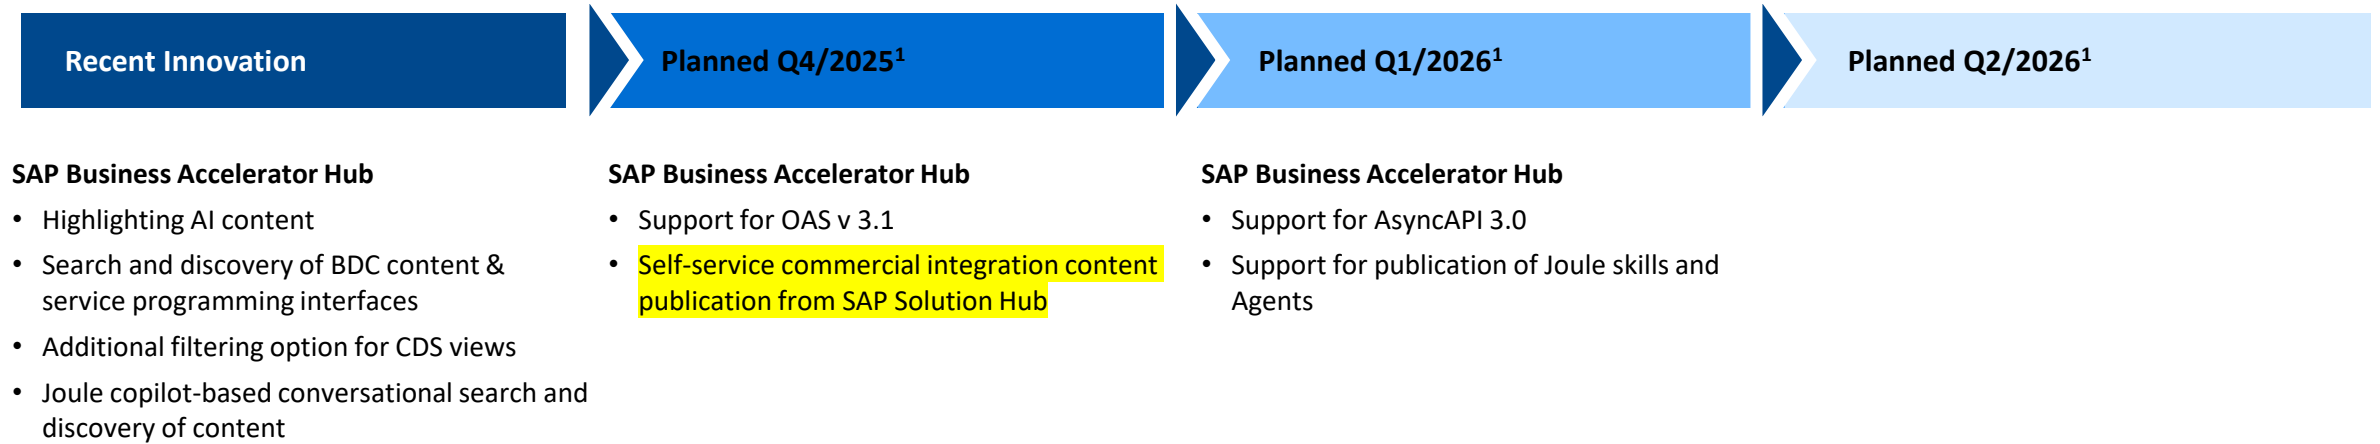

1. This is the current state of planning and may be changed by SAP at any time without notice.

SAP Integration Suite – Event-driven Integration
## Product road map overview – Key innovations

Recent Innovation	Planned Q3 & Q4/2025[1]	Planned Q1/2026[1]	Planned Q2/2026[1]

Event Mesh *

- Event Mesh as new capability
- Enabling webhook and REST support
- Enabling MQTT support

SAP Integration Suite, advanced event mesh **

- Direct consumption of SAP S/4HANA (Cloud) events
- Additional data centers
- Declarative SEMP
- Distributed trace for REST-based clients using AMQP
- Pushing event portal configuration to broker mesh
- Bridging Event Mesh
- Event add-on for ERP
- Integration with SAP Cloud Application Event Hub

SAP Integration Suite, advanced event mesh **

- Integration with SAP Cloud Application Programming Model
- Proxy support for AEM adapter
- Migration support from SAP Event Mesh and Event Mesh capability within ISuite
- Integration with health monitoring in SAP Cloud ALM and SAP Focused Run

SAP Integration Suite, advanced event mesh **

- Discovery and publication of advanced event mesh events in the developer hub

Event Mesh *

- Integration with SAP Cloud Application Event Hub

SAP Integration Suite, advanced event mesh **

- Distributed tracing enablement between SAP S/4HANA and advanced event mesh
- Scenario monitoring in SAP Cloud ALM and SAP Focused Run

1. This is the current state of planning and may be changed by SAP at any time without notice.

* Only with SAP Integration Suite, standard or premium editions or CPEA
** Available with SAP Integration Suite, advanced event mesh

SAP Integration Suite Road Maps

SAP Integration Suite

Edge Integration Cell

SAP Cloud Integration (standalone)

THE BEST RUN **SAP**

Key Takeaways

Summary

SAP Integration Suite …

Is a comprehensive and enterprise-grade integration platform covering all integration use cases, such as A2A, B2B, B2G, API-based, and event-driven integration

Provides a rich set of prebuilt integration content for a tight integration with SAP and non-SAP applications

Drives the digital transformation of customers across industries globally

What does the Future of Integration mean for SAP?

Q & A

SAP Business Accelerator Hub @ hub.sap.com

Start Your Enterprise Automation Journey

1

Learn more

- Visit sap.com/enterprise-automation
- Explore pre-built integration and automation content from the SAP Business Accelerator Hub
- Whitepaper: How to get started with Enterprise Automation

2

Get started at no cost

- Speak to your SAP team about the workshops and process assessments available

3

Try a workshop

- Build a use case with SAP BTP Free Tier version for SAP Build Process Automation
- Activate your SAP Build entitlements or SAP Signavio entitlements included in your RISE for SAP offering

Messages – Cloud Integration

In the context of Cloud Integration capability of Integration Suite, the **combined (aggregated) size of all outbound messages** via one or more receiver(s) adapter is considered for message metering.

For **synchronous calls** via receiver adapter, the message size of **both request and response messages** processed by receiver adapter together is considered for the message size measurements

If the combined size is less than or equal to **250KB**, it will be considered as one message.
If it is **more than 250KB**, it will be counted **in blocks of 250KB**.
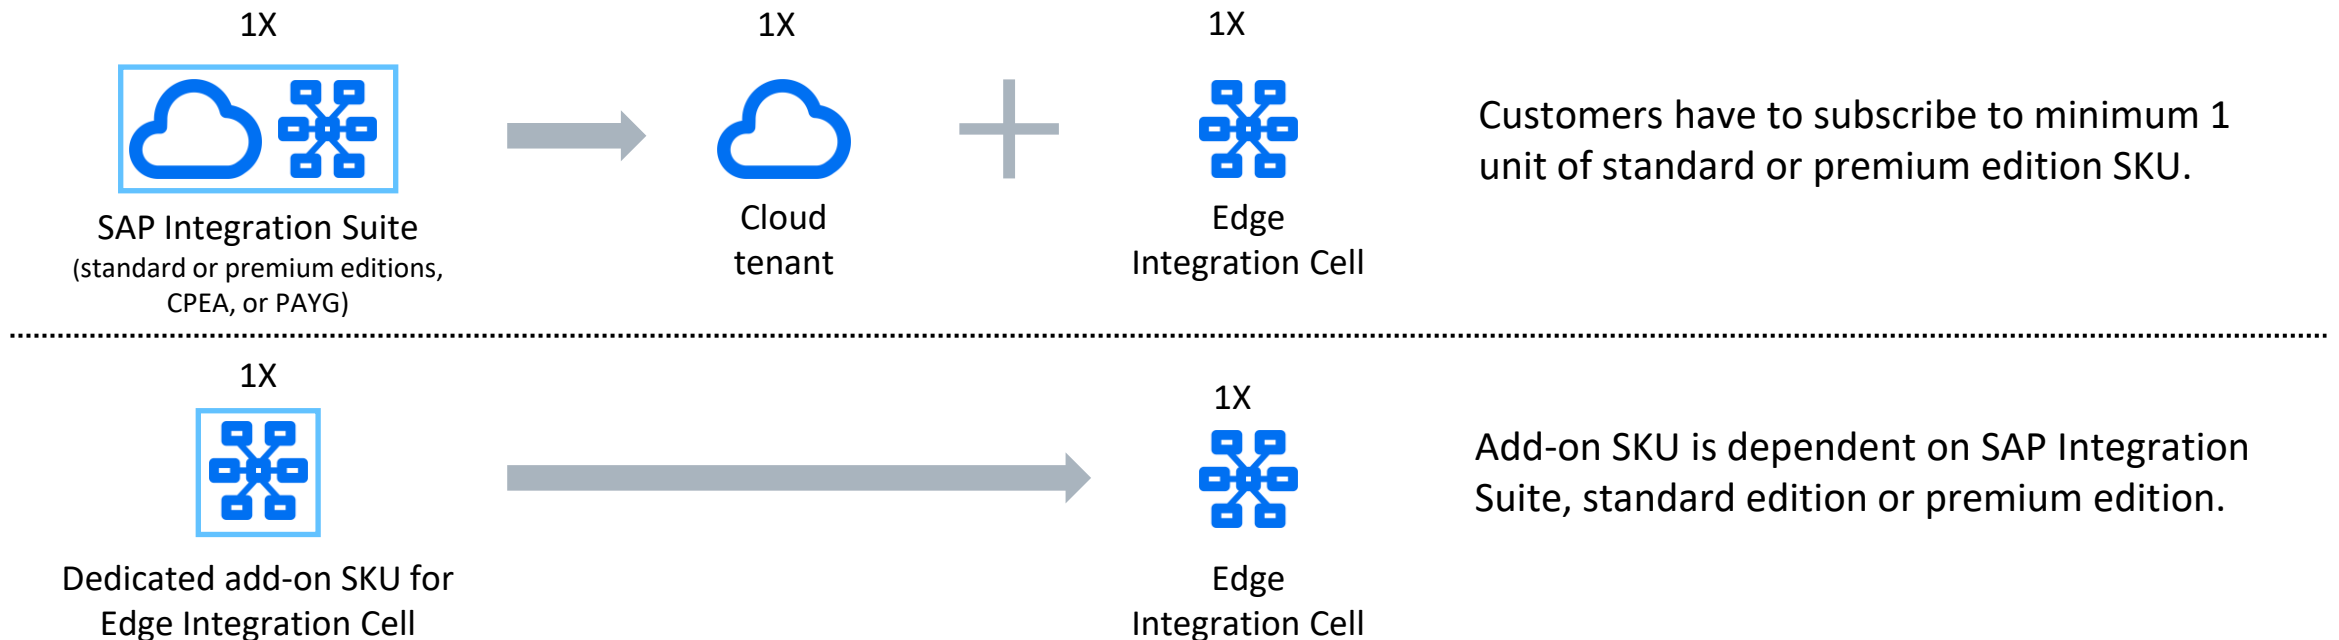

Exception: **Splitter**
In case of integration flows using splitter, each split outbound message via receiver adapter(s) will be counted as separate message.

https://launchpad.support.sap.com/#/notes/2942344

Definition of "synchronous call": a request made to another system that returns payload that will be processed in the integration flow. The status data is not measured (eg. HTTP status codes, JDBC response, …).

Licensing model

- Edge Integration Cell is included as a part of the existing SAP Integration Suite (for standard and premium editions and CPEA and PAYG).

- Additional Edge Integration Cell add-ons can be acquired through a separate add-on SKU.

- Only 50% of the messages that are processed by Edge Integration Cell are chargeable (excluding unmodified standard content for SAP-to-SAP software).
