

UN Certified hard wall FIBC bag from **GRAVIS**

## Solid Waste Disposal Made Easy

This flexible, UN-certified composite bulk bag is designed for the safe collection and disposal of hazardous waste and used absorbents. Its space-saving, collapsible design allows for convenient containment, making it perfect for easy shipping and disposal.

### Simple as 1-2-3

- 1 Unfold your **HazBulk** bag and stand-it-up
- 2 Open the top cover and begin filling (up to 3,000 lbs.)
- 3 Tie and seal the internal liner and then close the top cover

### Key Features

The **Hazbulk** bag features a polypropylene corrugated sleeve that maintains its structure, keeping it open during loading for efficient use. Its durable polypropylene outer layer resists oil and external damage, while an LLDPE liner provides extra protection against punctures and leaks, ensuring safe containment of hazardous solids. Additionally, the collapsible design allows for easy transportation and compact storage when not in use. This combination of strength, durability, and convenience makes it an ideal solution for the safe handling and disposal of hazardous materials.
