Why You Should Choose the Gravis StabiliSeed™ FIBC Bulk Bag instead of rigid plastic containers

✓ **Save Space**

100 empty bags take up the same space as 1 empty rigid container.

✓ **Save Labor**

StabiliSeed™ bags weigh less than 10 lbs. compared to 250+ lbs. for rigid containers.

✓ **Save Money**

Each economical bag, on average, costs less than \$20 while providing stable, stackable performance.

✗ **More Warehouse Space**

Increased storage space required to house empty containers.

✗ **Difficult to Move**

Even empty containers require a pallet jack or fork lift to move.

✗ **Very Expensive**

Prices can range from \$400 for smaller containers to nearly \$1,000 for extra large sizes.

From 20 lbs. to 20 tons.

Custom bulk packaging designed for seeds.

StabiliSeed™ FIBC Bulk Bag

- Designed specifically for the storage and transport of seeds.
- Proprietary baffle system and sewing process provides a guaranteed attachment that will not separate when filled.
- Internal baffle system keeps the bag square, improving stacking and storage efficiency.
- **Reduces Bulging During Transport:** Enhanced structure minimizes outward expansion, improving stability and safety.
- Customized fill and discharge options to best fit your equipment and processes.

10kg-50kg Poly Bag

- Made from high-quality woven polypropylene, strong enough to hold up to 50 kg while remaining lightweight.
- Options include loops or ties for easier filling and secure closure.
- Available in different finishes to suit specific application or protection needs.
- Compatible with Manual or Automated Filling: Designed for flexibility in both small-scale and high-volume operations.

SeaBulk® Container Liner

The Sea Bulk® Agricultural Liner sets the industry standard for the bulk transport of agricultural products. Designed for easy installation with minimal training, this liner accommodates any loading system, ensuring a seamless fit for a variety of agricultural products including seeds.

Not Just Another Supplier...

Gravis is a True Packaging Consultant

Building the Relationship

Our sales team works with you on-site to learn your processes from receiving raw materials to shipping out finished product. We will help identify packaging challenges that Gravis can solve.

The Right Solution Everytime

Gravis has a team of engineers that take your information and work with our manufacturers to design the perfect custom solution.

Reliable Long Term Partner

We continue to work closely with you to assist with managing orders, tracking inventory and maintaining the reliable quality that you expect from Gravis.

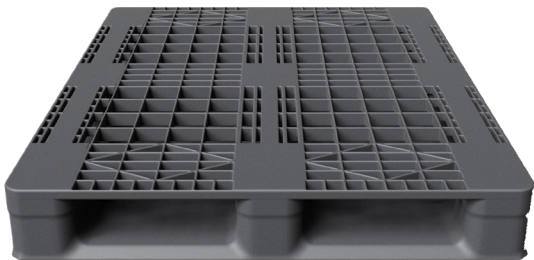

Save Space, Time, and Money

with multiple pallet options from Gravis.

All designed to compliment our StabiliSeed™ FIBC Bags.

FirmaLoad® Corrugated Pallets

- Safer and more stable than traditional pallets
- Designed specifically for FIBC Bulk Bags
- Approved for export
- 82% lighter than wooden pallets
