

## Unique space solutions for event & conference.

No noise from fans

Minimum assembly and disassembly time

Sustainable and circular

construction and fire safety

Optimal acoustics & sound insulation

Rooms for 1 to 1000+ people

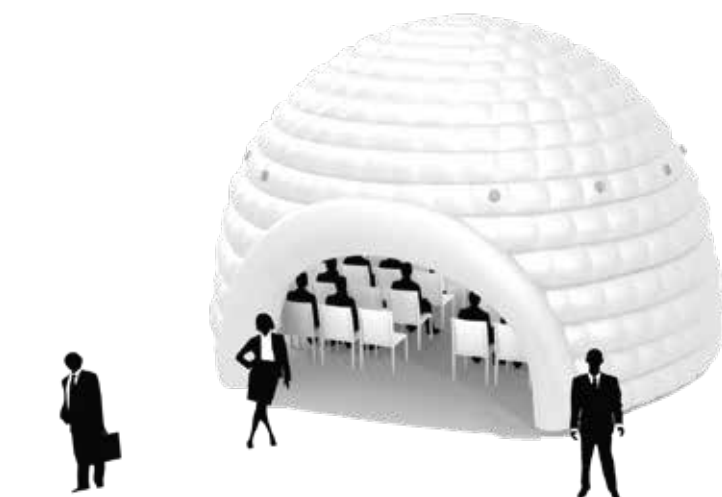

### Panorama

# Product Enhancement

## Acoustics and silent airflow

Our structures are optimized for acoustic properties, making them ideal for workshops and presentations, or acoustic partitions, for example. Also, our structures are equipped with an insulated blower system that is not audible.

## Sustainability and circularity

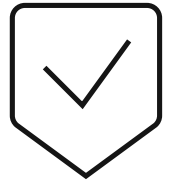

With QuickSpace products, you don't create waste at your event. Our products are cleaned in an environmentally friendly way after use, making them new-worthy at every event. At the end of life, our products are processed into other products such as storage bags, contributing to a circular economy.

## Branding

On request, this structure can be branded with your own branding, for example by theme colors, projection of logos or texts, or by means of TV screens or banners.

## Quick installation and dismantling

One of the benefits of QuickSpace products is the quick installation and dismantling. Hence, it is possible to install the structures at your convenient times, saving you costs and time. Our experienced teams will take care of the installation, disassembly and, if necessary, design of your event.

# Safety

## Fire safety certificates

All our structures have the most important fire safety certificates such as German B1, France M1 and American NFPA 701

## Construction safety

QuickSpace structures guarantee safe and stable spaces. Depending on the type of structure, there are integrated truss systems that give the structure stability. Structures with (partially) closed roofs are fitted with integrated truss systems in the doorways, so that the exits always remain open in case of emergencies. Safe, quick and easy setup and dismantling processes minimise accident risks, ensuring structures are correctly installed.
