**Q3. A challenge facing the country is sometimes said to be divisive when there are very different views on how best to solve it, and those views are strongly held by different sides of the debate. In contrast when most people are broadly agreed on how best to solve a challenge facing the country, the question is thought to be not divisive. Below are questions about challenges facing the UK. From your impressions and what you may have seen or heard, for each please say the extent to which you think each of these questions is divisive.**

## Engage Britain: Challenges Facing Britain Survey (Oct. 2018)

### ONLINE Fieldwork : 11th-18th October 2018

Absolutes/col percents

**Q3. A challenge facing the country is sometimes said to be divisive when there are very different views on how best to solve it, and those views are strongly held by different sides of the debate. In contrast when most people are broadly agreed on how best to solve a challenge facing the country, the question is thought to be not divisive. Below are questions about challenges facing the UK. From your impressions and what you may have seen or heard, for each please say the extent to which you think each of these questions is divisive.**

## Engage Britain: Challenges Facing Britain Survey (Oct. 2018)

ONLINE Fieldwork : 11th-18th October 2018

Absolutes/col percents

Table 243

**Q3. A challenge facing the country is sometimes said to be divisive when there are very different views on how best to solve it, and those views are strongly held by different sides of the debate. In contrast when most people are broadly agreed on how best to solve a challenge facing the country, the question is thought to be not divisive. Below are questions about challenges facing the UK. From your impressions and what you may have seen or heard, for each please say the extent to which you think each of these questions is divisive.**

|                                 |     | There are too many immigrants coming into the country | Immigration has made the UK a more vibrant and interesting place to live | Building more houses is the best way to reduce house prices | Protecting existing communities and their local environment from over-development is more important than building more houses | If we want to properly fund the NHS, most people's taxes are going to have to go up | People should pay for the cost of their care if they can afford to do so, so that the taxpayer doesn't have to shoulder all the burden | The benefit system makes it too easy for people to choose not to work | The growth of homelessness and the increasing use of food banks shows that cuts to benefits have gone too far | Actions taken by individuals will have no noticeable impact on climate change | We need to take serious action on climate change, even if it means that things like energy, travel and food become more expensive | Police need to be given more powers in order to protect the UK against terrorism (e.g. increased powers to monitor people's online activity and communication) | The government needs to work with minority communities when attempting to tackle terrorism in the UK | Harsher sentences for criminals will reduce the amount of violent crime in the UK | Giving children and young people more to do would reduce violent crime | Opening up more grammar schools across the UK would ensure that the brightest children can get the best education possible | Grammar schools ultimately only benefit the children of middle-class parents | If people want better job opportunities, it is up to them to move to where those jobs are | Government should shift investment to poorer areas to create more jobs there, even if this means that the economy as a whole is worse off | We need more free trade as this will make the UK richer | We should protect UK jobs and businesses from free trade as much as possible, even if this means that the price of goods from overseas goes up |

Q4. To what extent do you agree or disagree with each of the following statements?

Base: All respondents

People should pay for the cost of their care in old age if they can afford to do so, so that the taxpayer doesn't have to shoulder all the burden

Q4. To what extent do you agree or disagree with each of the following statements?

Base: All respondents

People should pay for the cost of their care in old age if they can afford to do so, so that the taxpayer doesn't have to shoulder all the burden

|                                 |     | There are too many immigrants coming into the country | Immigration has made the UK a more vibrant and interesting place to live | No matter what, Britain must be able to control who enters the country | Too much immigration has weakened the sense of community in my local area | There should be a cap on the number of immigrants allowed into the UK, even if this has a negative impact on the economy | I have noticed the negative effects of immigration in my own life | No matter what, the UK should always offer a safe home for refugees who are fleeing persecution and violence in their home country | The welfare system should make sure that immigrants living in the UK can always afford the basics such as housing costs, food, clothing and heating | Migrants should generally be allowed to come to the UK if they can pay their own way | Migrants should generally be allowed to come to the UK if they are committed to British values and culture |

|                                 |     | If we want to properly fund the NHS, most people's taxes are going to have to go up | Working people cannot afford to pay any more tax to fund the NHS and care system | I would happily pay more tax to fund the NHS, as long as I knew that's where my money was going | No one should be financially worse off just because they need long term care in old age | People should pay for the cost of their care in old age if they can afford to do so, so that the taxpayer doesn't have to shoulder all the burden | It is up to individuals to make sure that they have prepared financially for their care in old age | I have never thought about how I will pay for my care when I get older |

Q7b. To what extent do you agree or disagree with each of the following statements?

Base: All respondents selected to answer

People should pay for the cost of their care in old age if they can afford to do so, so that the taxpayer doesn't have to shoulder all the burden

**Summary table**

|                                 |     | The benefit system makes it too easy for people to choose not to work | I personally know someone who struggles to pay for the basics like food, clothing and heating | Most people with drug and alcohol addictions only have themselves to blame | The safety net provided by the welfare state means that real poverty doesn't exist in the UK | Stories in the media about benefit cheats make the problem sound worse than it actually is | If a healthy person is unemployed for more than six months, it is usually because they aren't trying hard enough to find a job | The solution to reducing poverty is to help businesses create more jobs by reducing red tape | In the UK it is possible to be in work and in poverty | The growth of homelessness and the increasing use of food banks shows that cuts to benefits have gone too far |
