

# Add AnyDay Virtual Card to Your Mobile Wallet

Make payments fast, secure, and convenient by adding your AnyDay virtual card to **Apple Pay**, **Google Pay**, or **Samsung Wallet**. Follow these quick steps to set it up:

## 1. Open your wallet app and add a card

- Apple Pay: Open **Wallet**, tap **+** in the top-right corner, then select **Debit or Credit Card**.
- Google Pay: Open **Google Wallet**, tap **Add to Wallet** → **Payment Card**.
- Samsung Wallet: Open **Samsung Wallet**, go to **Menu** → **Cards** → **Add Card**.

## 2. Agree to the terms and enter your card details manually

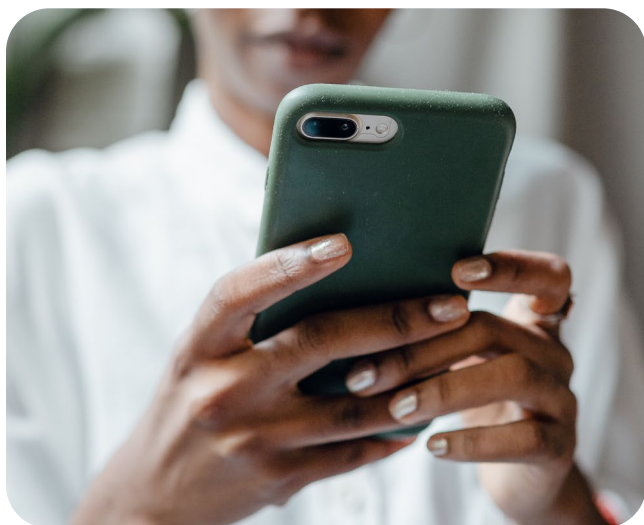

- When you add a card, you must agree to the card's terms and conditions.
- Since your AnyDay card is virtual, you'll need to type in the card info from your AnyDay app (scanning isn't available for virtual cards).

## 3. Verify your card

- In some cases, additional verification may be required if the information on your device (name, address, or phone number) doesn't match our records. The verification phone number will appear during setup.

## 4. Start paying with your mobile wallet

- Once the card is added, you can start using it to make in-store purchases with your phone.

## Experiencing Problems?

- Make sure your phone and AnyDay app are up to date.
- Keep the AnyDay app open for verification steps.
- Need help? Contact [customersupport@dcbank.ca](mailto:customersupport@dcbank.ca) or call 1-866-231-0373.
