Distribute tips instantly

How it works 🧐

01 Decide which job codes will be the contributors that will share a portion of their earned tips

02 Select the contributors and select any job codes are going to be receivers (you can name each group too)

03 Customize separate tip sharing by service and service times

04 Set the percentage of tips that will be placed in the pool - this can be % of their net sales or % of their total tips

05 Let the tip calculator work its magic and calculate for you

More features ✨

✓ Track any undistributed amounts (to the penny) and hold them in a digital wallet for later once they've accumulated

✓ Detailed rule breakdown lets you account for pre-set rules and allows each member have full transparency of the tip share and rules

✓ Print reports to see sales performance snapshots, tips summary and share with your team as needed

✓ Share the pool with team members for approval before it gets paid out. Transparent tip share = happy employees
