

OUR CUSTOMERS KNOW US BEST!

“Working with Custom Mechanical Equipment (CME) has been an absolute pleasure. Their entire staff embodies professionalism and expertise in every interaction. From the initial inquiry to project completion, their team's responsiveness and commitment to impeccable customer service stood out. CME's knowledge of the industry is evident in their proactive approach to addressing challenges and ensuring project success. They consistently go above and beyond, whether it's providing pre-construction guidance, supervising onsite installations, or offering comprehensive start-up support.

Their dedication doesn't end there; they prioritize end-user training and continue to offer exceptional customer relationship support long after the project concludes. I highly recommend CME to anyone seeking a reliable partner for their mechanical equipment needs.”

- Tony Finch Sales Manager Texas AirSystems

“CME is an invaluable partner to our business. We have purchased hundreds of electrical racks, more than a dozen skid mounted buildings, and various other custom fabricated items. Their ownership and employees take great pride in the work. Their experience and capabilities are great asset to us and our clients. They continually adapt to our fabrication and electrical needs. They always go that extra mile to ensure that we are providing a top-quality product. I would recommend CME to anyone looking for a true partner for their fabrication, assembly, and project needs.”

- Colby Brock, General Manager, Integral Dynamics

"Custom Mechanical Equipment (CME) has worked steadfastly to ensure that Lodi Unified School District experienced the highest level of excellent customer service. Their staff takes on each job assignment with vigor and tenacity. Their commitment to the details and schedule compliance stands as an example to the industry. The CME staff commits themselves daily to each job assignment and executes on time and within your budget. Their positive leadership style is demonstrated by their teams' skills, job commitment, and cooperative behaviors."

- Mitch Slater, Lodi Unified, Director of Maintenance and Operations

"CME's field research of existing multi-zone rooftop units greatly reduces the man hours required to specify replacement units. Phone conferences with CME lead to quick turnaround of selection data, reducing time required for ductwork routing. CME's drawings and specifications are now incorporated into our book of specification, thus expediting shop drawings and placement of CME orders. CME's team spirit is inspiring, especially during overtime hours that can be required to meet project deadlines."

- Brian Rose, Rose & Associates Engineering

"We have worked with CME and their dedicated staff for over 15 years. We have utilized their multizone replacement units in the California School market. This has been a great, cost effective solution for the budget conscious school districts. CME has provided responsive engineering support in the design phase, construction phase, and through projection completion on well over 20 successful projects."

- Mike Minge, Capital Engineering Consultants Inc, Lead Engineer

"CME has an HVAC solution for nearly all applications, particularly school districts, both primary and higher education. Their multi-zone penthouse provides precision zoning for classroom areas with components that are easily replaceable with off-the-shelf parts, not expensive OEM. The efficiencies of their systems are on par with any technology available: VRF, geothermal heat pumps, water source heat pumps, chilled water systems.

CME provides a full service experience for the end user from the initial building audit to the startup and commissioning of the equipment on site. Contractors love to work with CME because it takes any guess work out of field measurements or equipment operation. Lead times are reasonable and each customer's project is treated as its own project, not a cookie-cutter, or a one-size-fits-all. The technical staff and engineers are readily available to discuss any issues that may arise.

Of all the many HVAC manufacturers I have worked with over a nearly 40 year career, CME stands out as quality provider for both products and service."

- Charlotte Brunner, Lennox Industries, Commercial Territory Manager

"We have worked with CME on several projects over the years. Their inside engineering group works with our staff in the layout and design of these projects and they have all been extremely successful. Good equipment, good design, and good people to work with. Ted, PMZ Project Manager, is fantastic to work with and there is nothing he does not know about the equipment."

- Brian Lippert, Lippert Mechanical, Owner
