# About Us

When I set up the company, I wanted to ensure that our travellers experienced the hidden, the lesser known and the unexpected in every destination; the teahouses, old buildings, local markets, lanes and parks that tell a story. To follow a narrative of a place's past, helping us understand its present and perhaps allowing us a glimpse of its future. This is best achieved by walking the streets and talking to locals; which we do, both on tour and during the research stage.

We have two friendly offices in London and Melbourne and we are always available to talk and provide personal service. We also run events for our clients. I'm very proud that travellers return to explore the world with us - so much so that we have an unofficial JBT 'family'! We're doing what we love to do, and it's gratifying to know that other people also love our tours.

Here's to exploring more of the world with you all - whether you are new to our tours or a valued JBT regular.

- Jon Baines

## Our Tours

---

A proud mum and her baby  
(by Liza Miller, Midwifery in Peru, June 2025)

We run **fully escorted, small-group, professional and cultural tours and cruises**.

**Our professional tours** give you specialist insight into your particular profession in another country through meetings with your peers and visits to, e.g., clinics, NGOs, hospitals and educational centres. Partners are welcome on all tours and CPD is available on some; please visit our website for details.

**Our cultural tours** open the world in new and precise ways through the prism of, e.g., botanical history, the history of belief or medicine, or cuisine. Discover unexpected facets of each destination - our curated tours are rich and exciting, created with expertise and enthusiasm.

Every tour takes you under the skin of a destination and straight to its heart. Uncover the unexpected, learn from local experts and burnish your understanding.

## Tour Leaders and Guides

---

Cigil, our wonderful national guide in Turkey

Our tour leaders are hand-picked for their experience, personality and passion. They provide professional, academic and cultural guidance alongside excellent local guides, who add depth, flavour and perspective as you travel around the country together.

The most important job of a tour leader is to provide pastoral care. Interesting, enthusiastic and accomplished people in their own right, tour leaders may also give specialist talks during the tour. They are the sort of person you will enjoy sharing a drink with at the end of a busy day.

Tour leaders work alongside our highly experienced national guides, most of whom we have worked with for many years. National guides look after the tour organisation and talk about local history, cuisine, education, traditions etc, as well as having the specialist knowledge to contextualise medical and technical translations on our professional tours. We have very enquiring travellers and our guides, such as Zhang (John) in China, 'Prince Charles' in South India, Long in Vietnam, Coco in Japan, Cigil in Turkey (pictured in Marmaris), Amr in Egypt and Frank in South Africa, receive rave reviews from even the most discerning guests.

## Projects We Support

---

Working on a mould, Jaipur Foot

There are many inspiring, ground-breaking local projects in the destinations we visit, encompassing independent charities or NGOs. Many of our itineraries support such projects, with some examples below.

In Rajasthan, **The Barefoot College** provides training to villagers in a variety of skills including health care, education and engineering.

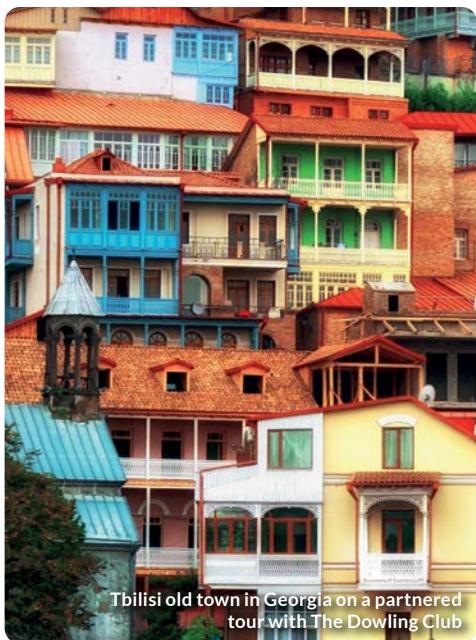

The extraordinary, multiple award-winning **Jaipur Foot** was founded in 1975 to provide artificial limbs to the poor.

The **Kim Long Charity Clinic** in central Vietnam provides free healthcare to underprivileged communities in remote areas.

In Bali, midwives, medical staff and outreach workers at **Yayasan Rama Sesana** improve the health of low-income women, and the NGO **Yayasan Bumi Sehat** provides primary health care and education for poor families.

## Partnered Tours

---

Tbilisi old town in Georgia on a partnered tour with The Dowling Club

As well as the tours and cruises in this brochure, we run bespoke tours in conjunction with organisations and professional bodies.

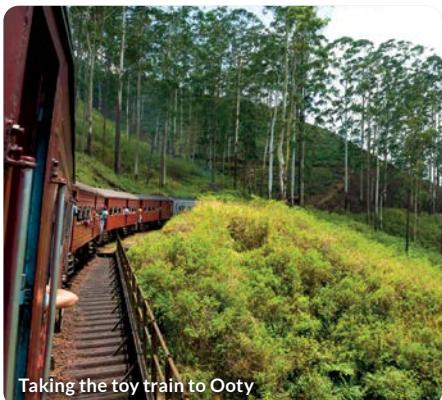

For many years we have partnered with organisations such as the **Royal Society of Medicine**, the **Australian College of Nursing** and the **Australian College of Midwives** – to name just a few – to create special interest tours, on which all are welcome.

In addition, we run private, 'closed group' tours exclusively for the members of organisations such as the **Travelling Surgical Society of Great Britain and Ireland**, **The Dowling Club** and the **West Kent Medico-Chirurgical Society**.

We also organise student study tours in conjunction with several Australian universities. Please contact us to find out more.

## How We Travel

---

Tours are a journey, an experience, and an adventure and the transport should be part of that. We try to include as much variety as possible. Internal flights are often necessary and save time, but to really see a country, overland is best. We like to include a rail journey, and we love to walk – the best way to get to know a town or city centre. Wandering the streets allows for browsing, listening and musing; stopping for that spontaneous drink, or unusual snack, or that surreal purchase. To spice up our tours we also travel by rickshaw, ox cart, jeep, ferry, cable car, rice barge and bus. *Bon voyage!*

## What We Eat

---

We make sure that you enjoy the best of a country's cuisine and drinks. We also try to be as local as possible, with some tours offering cooking experiences. Many of our regular meals add to your cultural experience, such as a meal at the Koto charity in Hanoi, brandy tasting in Armenia, a cup of chá in a relaxed Sichuan teahouse, Kobe beef in Kobe or tasty samples on a culinary walking tour in Istanbul. Or you might enjoy a homemade lunch on a spice smallholding in Sri Lanka, experience locavore in Crete, sip wine from a medieval wine window in Florence, or sample chichi fréglis in Marseilles.

## Where We Stay

---

When it comes to accommodation we like charm, comfort, a central location and good service. Wherever possible, we stay in buildings that reflect the culture of the destination.

Sometimes, however, period charm means cold rooms, intermittent plumbing and unresponsive staff - in which case we will book that reliable, modern hotel.

We also like variety; from the city *grand dame*, to the contemporary boutique, to the bungalow, to the unusual (a boulder hotel, or perhaps a rice barge). A good bar area to gather of an evening is also important. On our cruises, we aim to use smaller ships, such as the pictured MS Monet, with their intimacy, service and style.
