

3rd Quarter
Quarterly Report

www.arcticzymes.com

2023

Highlights from Q3 and first 9 months 2023

- ArcticZymes Technologies (AZT) had Q3 sales of NOK 31.2 million (Q3 2022: NOK 29.3 million) and sales for the first 9 months of NOK 90.6 million (9M 2022: NOK 108.8 million, NOK 93.8 million adjusted for Covid effects in 2022)
- AZT had a positive EBITDA for Q3 of NOK 7.3 million (Q3 2022: NOK 2.8 million) and a positive EBITDA for the first 9 months of NOK 20.2 million (9M 2022: NOK 40.2 million and NOK 25.2 million adjusted for Covid effects in 2022)
- Operating expenses for Q3 were 23.9 million (Q3 2022: NOK 24.5 million) and for the first 9 months expenses were NOK 70.3 million (9M 2022: NOK 69.0 million)
- Cash flow for Q3 was positive NOK 7.0 million (Q3 2022: NOK 7.6 million) and NOK 2.6 million (9M 2022: NOK 38.2 million) for the first nine months of 2023, giving a cash balance of NOK 246.8 million
- Received positive confirmation on the filing of Drug Master File (DMF) for SAN HQ GMP
- New CEO Michael Akoh commenced in his position on September 18, 2023

Key financial figures:

MNOK	Q3 2023	Q3 2022	Change	YTD 2023	YTD 2022	Change
Sales	31.2	29.3	+ 6 %	90.6	108.8	- 17 %
Total revenues	31.2	29.7	+ 5 %	90.6	109.2	- 17 %
Operating expenses	23.9	24.5	- 2 %	70.3	69.0	+ 2 %
EBITDA	7.3	2.8	+ 161 %	20.2	40.2	- 50 %

EBIT	5.7	1.5	+ 280 %	15.4	36.5	- 58 %
Changes in cash	7.0	7.6	- 8 %	2.6	38.2	- 92 %

Introduction

ArcticZymes Technologies ASA, (hereinafter “AZT” or “the Company”) is a Norwegian life sciences company with its core business focused on specialised and novel enzymes.

Operational review

Commercial

Sales for Q3 2023 were NOK 31.2 million, which was a 6% growth versus the same quarter in 2022.

Several factors continued to influence sales such as:

- Continued economic uncertainty, depressed company valuations and a tough capital-raising environment requiring companies to “tighten their belts”.
- Lower production levels and project delays resulting in reduced demand for compounds used to make therapeutics and vaccines, especially in North America.
- Longer than expected ongoing inventory reductions after the end of the Covid-19 pandemic. These inventory reductions are expected to diminish after Q4 2023.
- Declining economic activity in China

The geographical distribution of sales for the Q3 was 43% Americas, 56% EMEA and 1% APAC (Q3 2022: 51%, 36% and 13%, respectively). New customers placing orders for the first time were 21 in the third quarter, split by 16 in Molecular Tools and 5 in Biomanufacturing.

Biomanufacturing

Biomanufacturing contributed 52% towards total Q3 2023 sales (55% in Q3 of 2022). Sales were steady in Q3 2023 versus Q3 2022. This was expected as orders were affected by customers continuing to destock and depleting increased inventory levels. This destocking effect is

expected to continue until the end of 2023. On top of that, there was decreased activity with Biopharma companies in North America due to Cell & Gene Therapy projects being delayed or put on hold.

To support customers in the commercialisation of their therapeutic applications in the US market, ArcticZymes established a Drug Master File (DMF) for its SAN HQ enzyme which represents a key strategic initiative for the Company. ArcticZymes passed the DMF filing Type II with the US Food and Drug Administration (FDA) in September 2023 and has received the acknowledgement letter with the Master File number 29754 as a reference. This means that ArcticZymes can provide its customers with a Letter of Authorization (LoA) for their product registrations with the US FDA upon request. ArcticZymes anticipates commercial launch of the corresponding SAN HQ GMP product in Q4 2023. Beyond the SAN product line, ArcticZymes continues to be in active discussions with numerous pharmaceutical and biotech customers in addition to academic experts in the field regarding their future needs in RNA therapeutics and other Biomanufacturing applications.

Molecular Tools (Diagnostics & Research)

Molecular Tools serve both molecular diagnostics and molecular research and contributed 48% towards total sales in Q3 2023 (45% Q3, 2022).

The Company grew its Molecular Tools portfolio by 11% in Q3 2023 versus Q3 2022 and expects further organic growth, especially with its dsDNases and Polymerases product offerings.

ArcticZymes launched one new product in quarter 3: AZtaq™ DNA Polymerase. AZtaq™ is a high-quality thermostable DNA polymerase suitable for use in polymerase chain reaction (PCR) applications.

Launching the AZtaq™ is a natural expansion of the Company’s molecular tools portfolio. Being an essential enzyme in PCR, thermostable DNA

polymerase plays a pivotal role and enables numerous applications within molecular diagnostics and research. The Company expects to see synergies with their existing products currently supporting PCR workflows. Being able to serve customers with a more complete enzyme offering will be an important driver for sales growth in the molecular tools business.

Innovations

The Company continues to focus on driving innovations from ideation through to product launch and technical support.

In Biomanufacturing, AZT continues to work towards the launch of 'SAN HQ GMP' in Q4. This new 'GMP grade' salt active nuclease product will be fully supported with both marketing material and the filed DMF.

Additional support for the salt active nuclease (SAN) product portfolio comes with the external development of a SAN HQ ELISA "version 2" kit. This next-generation product, driven by market trends and voice-of-customer, will be a more sensitive version of our existing SAN ELISA kit with an increased limit of quantification, an improved plate format, and a better user experience. This product is scheduled for launch during 2024.

Two additional product launches are expected shortly concerning the classic RNA 'workhorse' enzyme "T7 RNA polymerase". This new product introduction will be available in two different grades. The regular grade will be introduced and supplement the Molecular Tools portfolio and will be launched in Q4 this year; the higher quality 'bioprocessing' grade will be launched early next year and join the Bioprocessing portfolio. The latter enzyme – T7 RNA polymerase HQ - will be ArcticZymes' first enzyme to target customers in the rapidly growing market encompassing 'RNA processing and analytics' towards therapy and vaccine manufacture.

Additionally, in the RNA processing space we have also recently announced a completely novel RNA specific ribonuclease prototype. A patent has been filed for this prototype and if granted, will strengthen the ArcticZymes IP portfolio. The prototype is currently being made available to selected customers and gaining interest from some key opinion leaders. Consequently, this prototype is planned to be launched as new product during 2024.

In Molecular Tools, as previously reported, AZT launched the AZtaq™ DNA polymerase on August 10th to help build out the enzyme portfolio towards Molecular Diagnostics. There is ongoing activity to increase our enzyme portfolio further in molecular tools.

Finally, within Molecular Tools a new prototype, IsoPol BSU+, has been developed. This enzyme is a good example of customer-driven innovation and has already been extensively field-tested and received positive market feedback in the NGS (Next Generation Sequencing) space.

Operations

The focus in the 3rd quarter of 2023 has mainly been preparation of the SAN HQ GMP manufacturing processes. When completed, the validation report will be amended to the DMF. In addition to internal GMP training, the intense preparations have increased awareness and improved competence towards GMP work in Operations.

Transfer of the manufacturing processes for T7 RNA Polymerase Molecular Tools grade from R&D to Operations was initiated end of Q3 with the ambition to complete the validation batches and get ready for launch in Q4.

Strategic growth initiatives

The Company continues to focus on organic growth whilst remaining opportunistic with

regards to potential M&A and in-licensing opportunities.

Financial review

AZT reported sales of NOK 31.2 million (Q3 2022: 29.3 M) for the third quarter of 2023. Earnings before tax, interest, depreciation, and amortisation (EBITDA) were NOK 7.3 million (Q3 2022: 2.8 M) and earnings before interest and tax (EBIT) were NOK 5.7 million (Q3 2022: 1.5 M) in the quarter. Net financial income was a profit of NOK 2.8 million (Q3 2022: 1.7 M).

For the first 9 months of 2023, AZT reported sales of NOK 90.6 million (9m 2022: 108.8 M). Earnings before tax, interest, depreciation, and amortisation (EBITDA) were NOK 20.2 million (9m 2022: 40.2 M) and earnings before interest and tax (EBIT) were NOK 15.4 million (9m 2022: 36.5 M). Net financial income was a profit of NOK 6.8 million (9m 2022: 4.5 M).

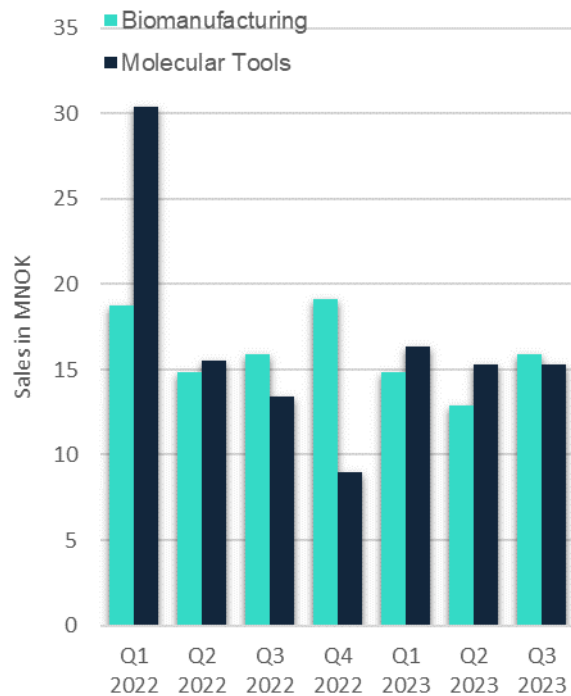

Sales & EBITDA

Currency effects

The Company's revenues are primarily denominated in Euro and USD which impacts the financial statement. A strengthening or weakening of the NOK versus USD and EURO will influence underlying growth figures. By using equivalent exchange rates in 2023 as 2022, revenues would have been NOK 1.6 million lower for the third quarter of 2023 and NOK 10.0 million lower for the first 9 months. Changes in USD versus NOK continues to be the key driver for the currency effects experienced during 2023.

Sales per area

In Biomanufacturing, sales were slightly higher than previous quarters with NOK 15.9 million in Q3 2023.

For the third quarter of 2023, Biomanufacturing experienced flat growth compared to the same quarter last year. For the last 12 months quarterly average, sales have grown from an average of NOK 15.3 million in Q3 2022 to NOK 15.7 million or an average quarterly growth of 3% in Q3 2023.

For Molecular Tools, sales are on a higher level than the as second quarter last year with NOK 15.3 million in sales compared to NOK 13.4 million in the same period last year.

For the last 12 months, quarterly average sales, excluding covid has gone from NOK 16.0 million to NOK 14.0 million this year, or a decrease of 13%.

Operating expenses were reduced by NOK 3.0 million or 11% in Q3 2023 compared to Q3 2022, primarily explained by capitalisation of projects having reached milestones.

Currency effects on receivables increased Q3 2023 operating expenses by NOK 0.6 million in the quarter whereas expenses are reduced by NOK 1.0 million for the first 9 months. For Q3 2022, the figure was a reduction of expenses of NOK 1.3 million and a reduction of 2.7 million for the first 9 months of 2022.

The Company has finalised its recruitment drive for the planned organic growth initiative. Most positions are filled with startup in 2H 2023. The Company expects personnel expenses for 2023 to be less than the expected NOK 75 million for the full year as more projects are capitalised according to IFRS rules.

Other operating expenses are expected to be lower in 2023 compared to 2022 as the company plans to outsource fewer projects.

Extraordinary items for the period

Personnel expenses in the first quarter are impacted positively by NOK 0.4 million in accrued employer's national insurance contribution on options. The accrual and expense will fluctuate moving forward together with fluctuations in the share price. The Company also received NOK 0.7 million related to national insurance contributions from 2022 on a former employee.

The Company received an invoice from SIVA relating to previous years rent of AZ facilities in Tromsø that impacted operating expenses negatively by 0.4 million.

Taxes

For Q3 2023, the Company recognised NOK 2.4 million (Q3 2022: 0.7 M) in tax expenses and for the first 9 months NOK 5.5 million (9M 2022: 9.0 million) which will be offset against deferred tax assets.

Financial position

Total equity amounted to NOK 305.5 million at the end of Q3 2023 compared to NOK 279.9 and 284.7 million at the end of Q3 2022 and Q4 2022, respectively.

Total assets were NOK 334.7 million at the end of Q3 2023, up from NOK 313.4 million at the end of Q3 2022 and up from NOK 319.0 million at the end of Q4 2022.

The Company has no interest-bearing debt.

Cash flow

Net cash flow from operating activities was NOK 15.6 million for the first 9 months in 2023 compared to NOK 45.4 million in the same period in 2022. The difference in cash flows from operations is explained by settlement in scale up projects, inventory build-up, reduction of payables and that the company had low sales in first half of 2023 compared to the same period last year.

Cash flow from investing activities was NOK -7.0 million in the quarter and NOK -12.7 million for the first 9 months. This is primarily explained by NOK 6.5 million in investments classified as intangible assets and NOK 0.5 million in equipment related to production and R&D facilities in the quarter. Investments related to the DMF submission were NOK 1.1 million in Q3 and NOK 5.0 million for the first 9 months.

Cash flow from financing activities was NOK -0.9 million for the quarter explained by payments on lease liabilities (premises) and NOK -0.3 million for the first 9 months.

Changes in cash and cash equivalents was NOK +2.6 million for the first 9 months in 2023. This generated a cash balance of NOK 246.8 million at the end of the quarter, compared to NOK 244.2 million at the end of 2022.

Cash position

Shareholder matters

The total number of issued shares was 50,871,390 at the end of the quarter. 300,000 shares were issued in the Q2 2023 due to exercise of options.

595,000 options are outstanding as of 30.09.2023.

See the annual report for 2022 and notes 3 and 6 in the Q3 2023 financial statement for further details on option programs.

Risk factors

AZT's business is exposed to several risk factors that may affect parts of or all the Company's activities. There are risks associated with development, regulatory approval, and sales in

ArcticZymes. The Company is actively entering new agreements to broaden the revenue base and secure business as a long-term critical component supplier. Success relating to new product introductions is not guaranteed, and sales will be dependent on customer implementation.

There are also risks related to exchange rate fluctuations from year to year which impact underlying sales in the Company as most revenues are in USD and Euro.

The war in Ukraine has not materially affected the Company.

Also, see the risk factors which are described in the annual report for 2022 and published on the Company's website www.arcticzymes.com.

Outlook

The outlook for Q4 2023 is that the fundamental business is still strong but headwinds in the market will continue thereby putting pressure on sales.

The Company will launch SAN HQ GMP before the end of the year and uptake in sales is expected to come from 2024 onwards. Significant investments will continue to be made in commercializing SAN HQ through a comprehensive marketing campaign.

The interim financial statement 30. September 2023 (Q3)

Notes to the interim accounts for 30. September 2023 (Q3)

Note 1 Basis of preparation of financial statements

The assumptions applied in the quarterly financial statements for 2023 that may affect the use of accounting principles, book values of assets and liabilities, revenues and expenses are similar to the assumptions found/used in the financial statement for 2022.

These financial statements are the unaudited interim consolidated financial statements (hereafter "the Interim Financial Statements") of ArcticZymes Technologies ASA and its subsidiaries (hereafter "the Group") for the period ended 30. September 2023. The Interim Financial Statements are prepared in accordance with the International Accounting Standard 34 (IAS 34) and should be read in conjunction with the Consolidated Financial Statements for the year, ended 31. December 2022. (hereafter "the Annual Financial Statements"), as they provide an update of previously reported information.

Note 2 Analysis of operating revenue and -expenses and segment information

The Group recognise revenues according to IFRS 15 when it transfers control over a good or service to a customer.

ArcticZymes sales revenues are enzymes for use in molecular research, In Vitro Diagnostics and biomanufacturing.

Most of the revenues are from quotes or non binding supply agreements where the price has been agreed upon in advance.

Other operating income are government tax grants, research grants.

Services provided by the parent company are expensed at segment according to agreements with actual subsidiary.

For further information refer to note 5 in the Annual report for 2022

Note 3 Impacts of COVID-19 and the war in Ukraine

The Group's sales figures has historically been impacted by COVID-19 effects, but there are limited sales over the last 6 quarters that are associated with COVID-19. The Company does not foresee any material COVID-19 effects in sales moving forward.

The war in Ukraine has not impacted the company directly or in a material way. The Company has experienced longer lead time on consumables used in production and R&D, but if this is a result of the war or general macro economic climate in hard to explain. The Company has no direct, nor indirect sales to Russia.

Note 4 Alternative Performance Measures

EBITDA & EBIT

EBITDA is widely used by investors when evaluating and comparing businesses, and provides an analysis of the operating results excluding depreciation and amortisation. The non-cash elements depreciation and amortization may vary significantly between companies depending on the value and type of assets.

The definition of EBITDA is "Earnings Before Interest, Tax, Depreciation and Amortization" and EBIT is "Earnings Before Interest and Taxes". The reconciliation to the IFRS accounts is as follows:

(Amounts in NOK 1 000 - except EPS)	Q3		YTD	
	2023	2022	2023	2022
Sales	31 151	29 299	90 559	108 817
Other revenues		403		407

Note 5 Taxes

The calculation of deferred tax asset and tax expense as of September 30, 2023 and December 31, 2022 is based on a tax rate of 22%. The deferred tax asset is decreased to NOK 5.8 million due to changes in tax loss in the period. The deferred tax asset was NOK 11.2 million as of December 31, 2022. The basis for recognition of a tax asset are the expected future profits according to the assumption that temporary differences for the coming years will be reversed. For further information refer to note 12 in the Annual report for 2022.

Intangible assets are depreciated by the linear method, depreciating the acquisition expense to the residual value over the estimated useful life, which are for each group of assets: Product rights and own product development are depreciating over 10 years.

Other development expenses are expensed when incurred. Previously expensed development costs are not recognised in subsequent periods. Capitalised development costs are depreciated linearly from the date of commercialisation over the period in which they are expected to provide economic benefits. Capitalised development costs are tested annually by indication for impairment in accordance with IAS 36.

For further information refer to notes 13,14 and 15 in the Annual report for 2022.

Note 7 Lease assets and liabilities

The Group have five contracts under IFRS16.

The subsidiary ArcticZymes has a contract for leasing offices with Share Lab in Oslo. The contract was re-negotiated in Q2-2023.

The Company signed a new contract Q2-2023 due to our need for additional space. The contract spans 3,5 years with a discount rate of 4,06%. Arcticzymes Technologies has in Q3 signed a new contract with Siva for more offices space, and the contract is for 2,5 years with 4,85% in discount rate.

For further information refer to note 15 in the Annual report for 2022.

(Amounts in NOK 1 000)

Financial position	30.09.2023	30.09.2022	31.12.2022
Lease assets	13 236	14 697	13 873
Sum lease assets	13 236	14 697	13 873
Lease liabilities	9 346	11 175	10 348
Sum lease liabilities	9 346	11 175	10 348

Short-term leases

The Group also lease computers and IT equipment with contract terms from 1 to 3 years. The Group has decided not to recognise leases where the underlying asset has a low value, and thus does not recognise lease obligations and lease assets for any of these assets. Instead, payments for leases are expensed when they occur.

Overhead expenses related to premises in contracts are expensed when they occur.

(Amounts in NOK 1 000)

Summary of other leased assets presented in the consolidated Profit & Loss statement	30.09.2023	30.09.2022	31.12.2022
Lease of IT equipment	361	192	263
Overhead expenses related to premises	867	686	1 002
Total leased assets inc. in other op. expenses	1 227	878	1 265

Note 8 Account receivables and other receivables

(Amounts in NOK 1 000)	30.09.2023	30.09.2022	31.12.2022
Account receivables	17 029	20 758	11 593
Research grants		906	817
Tax grants	71	39	630
VAT	1 313	1 332	1 028
Other receivables	2 169	1 643	3 936
Total account receivable and other receivables	20 582	24 678	18 004

Historically, the group has not incurred losses on accounts receivable. Based on this and the fact that there were no losses in 2022, and we expect no material future losses, no provisions for losses were made in Q3.

For further information refer to note 17 in the Annual report for 2022.
