

Bikes shouldn't be stolen.

BIKEBAZE®

Worry-free cycling starts here:
your **SafeTags**.

Welcome to **BIKEBAZE!**

Why BIKEBAZE?

Theft prevention

Risk of theft decreases.

Our eye-catching **SafeTags** are extra protected against vandalism, providing an additional layer of protection for your bike. Show that your bike is your property and that you actively contribute to a movement that combats bike theft.

Unique identification

Discourages theft.

Each bike receives a **unique identity**, centrally registered **under your name**. This database is accessible to both individuals and authorities, which is crucial in the event of theft.

Recovery

Chance of recovery increases.

If your bike does get stolen, the **BIKEBAZE Community** is there for you. Finders can contact you directly via a scan. Together, we help ensure a happy reunion.

First step.

To protect what is yours.

➤ **Go to bikebaze.nl!**

➤ **Register your bike.**

If you have not done this yet, link your bike to your name.

➤ **Activate your SafeTags.**

Using your unique included activation code, consisting of 6 characters and starting with "BB".
Go to bikebaze.nl/en/safetags-activation.

➤ **Activated? Start sticking.**

See the reverse side for instructions.

Scan the QR for a tutorial and practice scanning right away. Every SafeTag is an opportunity to contribute: spot one? Scan it!

Apply your SafeTags.

Make them stand out.

Before applying them to your chosen spot, check if the **QR code** is readable. Because of the curve, it may not scan properly.

Steps

- > Ensure the surface is perfectly clean: **dry, clean, and free of grease.**
- > Attach the SafeTags in the correct place and **press them down firmly.**
- > Do not disturb the SafeTag. **Do not touch it again.**

Where to attach?

General rule: make the SafeTags stand out. These are suggestions:

Electric bike? Place the small SafeTag **on your battery.**

Otherwise, under your handlebars or on your mudguard. The large one on the frame.
