BPS Utilised Fulltime Automated Spray Robot to Complete Plastering and Painting Works

BPS Global Group recently completed the plastering and painting of all walls inside a 1,188m² warehouse at the Sunshine Kowloon Bay Cargo Centre for its client. The project employed Fulltime's automated spray robot from Hangzhou, which efficiently and safely carried out all painting operations. The robot can spray walls up to 6 metres in height, making it suitable for warehouses with extra-high ceilings and significantly improving construction efficiency.

BPS Implemented RFID Technology to Optimise Air Freight Operations for a Cargo Terminal in Hong Kong

The BPS Global Group team had successfully completed a cargo terminal optimisation project for a large local logistics enterprise. The company's cargo terminal spans over 100,000 square feet and processes up to 260,000 items monthly. By adopting RFID (Radio Frequency Identification) technology, the project has significantly improved cargo handling speed and delivery accuracy.
