Why Cold Chain Warehousing Needs Automation?

For cold chain warehousing, the core challenge goes beyond simply cooling an enclosed space to a designated temperature. It lies in ensuring seamless operations while maintaining strict thermal consistency. From personnel entry and exit to material handling, picking and handovers, even subtle operational changes can trigger temperature fluctuations.

Hong Kong RGBC License & ISO Certifications: A Dual Defense for Corporate Property Revitalisation

As ESG becomes a core corporate strategy, Hong Kong is experiencing an unprecedented surge in industrial building revitalisation, smart logistics centre upgrades, and commercial property alteration projects. However, any project involving structural reorganisation, change of use or the installation of high-density equipment is fundamentally a capital-intensive and heavily regulated commercial investment.
