PROTECTIONS

Parameter	Notes
Short Circuit Protection	The input power shall decrease when the output rail short, the power supply shall not be damaged.
Over Current Protection	The product will enter hiccup status when 2 maximum load current applied to the output, and the product shall be self-recovery when the fault condition is removed.
Over Voltage Protection	When the output voltage is over 1.1-1.5 Rated Load Voltage, the driver shuts off automatically and enters protection status, the power supply will work normally after fault condition removed and AC input reapply.
