The estimated rebate incentive represents the maximum incentive for the proposed project based on the approved value of each proposed measure at the time of this reservation of funds, and these measure values are subject to change. The actual incentive paid is contingent on the approved value of each installed measure at the time of project completion, which may be verified by a site inspection. You as the customer are responsible for the contractor's work and costs not covered by the incentive. See the Rebate Application for program Terms and Conditions and please note that all program procedures, requirements and rebate levels are subject to change or cancellation without notice and are subject to program funds being available and regulatory approval.

The invoice should include a description of the equipment installed, quantity, and unit price (e.g. material price per fixture, motor, etc.). Material and labor should be indicated separately. If you are requesting an audit cost reimbursement, the audit cost should be indicated separately on the invoice or may be submitted as a separate invoice.

Additionally, please be aware that you may receive a survey regarding your satisfaction with the Program, and you may be asked to have your equipment verified by a Dominion Energy contractor at a time that is convenient for you. These are great opportunities for you to communicate the value of Dominion Energy's rebate offerings in your decision to have this energy-saving work performed. Your positive feedback will help ensure energy efficiency rebates are available to customers in the future. If you have any questions, please call **888-366-8280**.
