

Waterfront Condo

KIRKLAND, WA

This elegant lakefront condo in Kirkland has been remodeled to provide the owners with a contemporary home featuring custom finishes and ample storage throughout. The two-bedroom, two-bathroom condo is a cozy 1,269 square feet, which meant that every inch of the space was carefully calculated to ensure that maximum efficiency for both storage and comfortable living. Our architecture and interior design teams worked closely throughout the entire design and construction process to ensure every detail was perfected.

Prior to the remodel, the condo was filled with dark cabinets and floors, which made the space feel quite small. The solution was to open up the space through the use of lighter hues mixed with strategically placed rich woods. The new seamless look minimizes visual distraction while offering an increase in storage throughout the entire space.

In the kitchen every angle signifies a clean and modern appeal that is ideal for a dinner with the family. The host can cook and still engage with the guests while they sit at the dining room banquette that overlooks the waterfront. Both the primary bedroom and guestroom have a full-length wall of wardrobe cabinetry that provides plentiful space – allowing for each room to be free from clutter that maintains an elegant yet comfortable space. The lighting in each room evokes a cozy glow, echoing the feeling of the bedding selections. In the primary bedroom there are two gold pendant lights that hang right above the nightstands adding a beautiful radiance.
