

## West Seattle Bath

SEATTLE, WA

The design blends the homeowner's love of color and playfulness with timeless, classic elements to create a lively yet enduring space. The original shower and toilet locations were swapped to allow for a glamorous walk-in shower and a separate water closet room.

Heath tile was used to infuse the space with color and texture. The teal tile on the floor creates a unifying base and dances across the bathroom floor with a twisting arrangement while the light green tile offers a serene atmosphere in the shower. The pink accent tile adds a playful touch, with the use of pink continued in other elements, such as the bright pink faucet and the soft two-tone paint in the water closet.

To accommodate the owner's fur baby, the vanity was specially designed to be a home for the litter box where it could be tucked away. This nook is also an excellent spot for items such as a small stool that could double as a bath-side table.
