

THE FITTEST YOU

Name: I
Test Period:

YOUR METABOLISM. MEASURED.

Daily Caloric Burn

1767 cal/day

Calories Eaten

2073 cal/day

Trendline of +0.6 lbs
per week indicates
surplus of 306 calories
per day

Calorie Intake by Objective

Currently eating
2073 cal/day

1660	1660	1767	1944	1945+
Max Safe Fat Loss (-0.2 lbs/week)	Burn Fat, Build Muscle (-0.2 lbs/week)	Maintenance	Build Muscle (+0.4 lbs/week)	Gain Weight (> +0.5 lbs/week)

Energy Budget

Physical Activity Level

THE FITTEST YOU

Body Composition – Weight: 203.0 lbs

Fat Free Mass:
126.1 lbs

Fat Mass:
76.9 lbs

Body Fat Percentage – Higher than 55% of peers

37.9%

Hydration – Water Throughput: 4.0 Liters/day

Total Body Water: 45%

How do you compare to the scientific literature?

Disclaimer:

The present Assessment/Report is intended for information purposes only and under no circumstances should it be considered a substitute for professional medical advice, diagnosis or treatment. You need to consult your physician and/or family doctor prior to engaging in any exercise program and/or changing your diet and/or habits as a result of the information provided by the present Assessment/Report. The Fittest You makes no representation that the present Assessment/Report will result in any improvement of your health and fitness status. You agree that participating in any workout regimen, physical exercise, or activity may result in an increased risk of physical injury based on the nature, frequency, intensity, and duration of the workout regimen, physical exercise, or activity. You agree that if you participate in any workout regimen, physical exercise, or activity, you do so at your own risk and you assume the risk of any and all injury and/or damage you may suffer.

THE FITTEST YOU

Name: [REDACTED]

Test Period: [REDACTED]

YOUR METABOLISM. MEASURED.

Daily Caloric Burn

2042 cal/day

Calories Eaten

1452 cal/day

Trendline of -1.2 lbs per week indicates deficit of 590 calories per day

Calorie Intake by Objective

Currently eating
1452 cal/day

1532	1838	2042	2247	2248+
Max Safe Fat Loss (-1.0 lbs/week)	Burn Fat, Build Muscle (-0.4 lbs/week)	Maintenance	Build Muscle (+0.4 lbs/week)	Gain Weight (> +0.5 lbs/week)

Energy Budget

Basal Metabolic Rate: 1530 cal/day	Activity: 512 cal/day
---------------------------------------	--------------------------

Physical Activity Level

1.34					
Sedentary	Lightly Active	Moderately Active	Highly Active	Athlete	Overreaching (>2.5)

THE FITTEST YOU

Complete Energy Budget

BMR: Basal Metabolic Rate

Calories burned at complete rest.

TEF: Thermic Effect of Food

Calories burned while digesting food.

EXERCISE

Calories burned during your logged workouts.

NEAT: Non-Exercise Activity Thermogenesis

Calories burned by non-exercise activity (e.g. work and daily life).

Energy Availability -

(non-exercise calories eaten per kilogram of lean body mass)

You may have limited energy to fuel all of your non-exercise physiological functions.

Training Sustainability -

Currently at 17% of sustainable limit

You're training sustainably and are currently 1782 calories per day below your upper limit for sustainable energy expenditure.

THE FITTEST YOU

Body Composition - Weight: 175.0 lbs

Fat Free Mass:
122.1 lbs

Fat Mass:
52.9 lbs

Body Fat Percentage - Lower than 72% of peers

30.3%

Hydration - Water Throughput: 3.7 Liters/day

Total Body Water: 51%
