

Enterprise Backup & Disaster Recovery

The Problems We Solve

It's not about features. It's about removing the risks that keep you up at night.

DATA SOVEREIGNTY

Your Data Stays in Europe

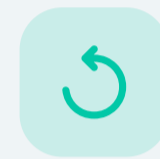

Growing regulatory pressure and geopolitical uncertainty make relying on US-based services a business risk. Our solution is developed, operated, and supported entirely in Norway — your data never leaves European soil.

PREDICTABLE COSTS

Stop Overpaying for Protection

Most businesses pay too much for backup solutions that don't match their needs. We deliver enterprise-grade resilience with flexible pricing — so you get the protection you need without the enterprise price tag.

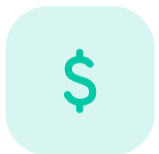

ZERO-DISRUPTION MIGRATION

Switch Without the Risk

Fear of a complicated migration keeps businesses locked into outdated or overpriced solutions. We handle the entire transition — no downtime, no data left behind, no headaches.

The Cost of Being Unprepared

These aren't hypothetical risks. They're business realities that happen every day.

Downtime Costs Money

Every minute of unplanned downtime drains revenue, stalls operations, and erodes competitive advantage.

Data Loss Costs Trust

Losing client data or business records damages relationships that took years to build — often beyond repair.

Ransomware Costs Reputation

A single breach can expose your organization to regulatory penalties, public scrutiny, and lasting brand damage.

Protect What Matters Most

Whether your environment runs on VMware, Hyper-V, Nutanix, Azure, or mixed platforms – we ensure consistent, policy-driven protection across all systems.

 Microsoft 365

 On-Premise Servers

 Virtual Machines

 Cloud Workloads

 SaaS Applications

 Hybrid Infrastructures

Why Enterprise Backup Is Different

Enterprise environments demand more than simple backups. They require a complete Disaster Recovery strategy – not just a backup job.

ZaveIT combines technology, automation, and operational expertise into a unified protection platform.

-  Immutable storage protection
-  Ransomware-resilient architecture
-  Defined RPO and RTO targets
-  Automated monitoring & verification
-  Documented recovery procedures
-  Compliance-ready reporting
-  Highly skilled assistance when needed

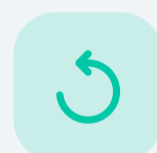

Disaster Recovery That Actually Works

Backup is only half the story. Recovery is what protects your business. We don't just store data. We ensure you can recover it – fast.

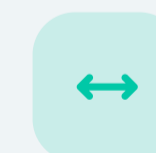

Instant VM Recovery

Spin up standby VMs in minutes, not hours

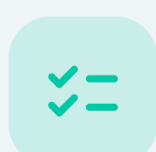

Granular Restore

File and application-level recovery

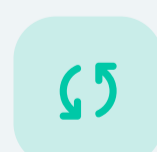

Cross-Platform

Restore and migrate across platforms

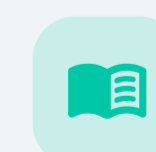

Testable DR

Validate scenarios before you need them

Failover & Failback

Structured planning for every scenario

DR Runbooks

Documented procedures ready to execute

 Proactive monitoring

 Regular integrity testing

 Alert management

 Capacity optimization

 Compliance documentation

Fully Managed by Experts

Your solution is backed by experienced operations specialists who monitor, maintain, and verify your backups continuously.

Gain enterprise-level protection without building your own backup operations team.

Flexible Architecture. Predictable Costs.

As your business scales, your protection scales with you.

 Scalable storage tiers

 Multi-location options

 Sovereign data hosting (EU / UK / Norway)

 Transparent pricing models

 Growth-ready infrastructure

Why Choose ZaveIT?

ZaveIT is more than a backup vendor. We are a digital platform partner — delivering enterprise backup and disaster recovery, simplified.

 Seamless onboarding

 Service automation

 Centralized management

 One portal for monitoring & governance

 Integrated reporting

 Unified billing

Get protected today!

Enterprise Backup & Disaster Recovery from ZaveIT ensures your business continues — even when systems fail.
