

# S3 Object Storage Under Your Brand

Offer unlimited, secure, and scalable S3 storage to your clients. White-label it, resell it, and create recurring revenue streams.

Get started

## Why Offer S3 to Your Clients?

Your clients need secure, compliant, and scalable storage – but building it yourself is complex and expensive. With ZaveIT's S3 Object Storage, you can offer enterprise-grade storage instantly under your own brand – no infrastructure, no headaches.

### The Growing Challenge

Data volumes are exploding – from backups, application data, and multimedia to compliance archives. Traditional storage solutions are expensive to scale, hard to manage, and offer little room for differentiation.

### Your Opportunity

Offer S3 Object Storage under your own brand. Create recurring revenue with a ready-to-sell, scalable, and fully managed service—without the infrastructure headache.

## Why MSPs Choose ZaveIT's S3 Storage

Transform commodity storage into premium, value-added services that differentiate your business and create lasting client relationships.

### White-label ready

Brand it as your own service with your logo, pricing, and packaging. Deliver a seamless, professional experience to your clients.

### Fast to launch

Get up and running in days, not months. Everything is pre-integrated and marketplace-ready – no setup delays.

### Recurring revenue

Turn storage demand into predictable monthly income. Build lasting customer relationships and stable margins.

### Scalable & secure

Offer enterprise-grade reliability, compliance, and 99.999999999% durability – without managing the infrastructure yourself.

### Flexible packaging

Bundle services like backup, hosting, or data lakes to meet different customer needs and grow your portfolio.

### Automated management

Simplify delivery, billing, and monitoring with built-in automation – so you can focus on customers, not admin.

## Real-World Ways MSPs Use S3 Object Storage

From backups to big data – here's how you can package S3 into valuable, recurring services your clients actually need.

### Backup & Recovery

Deliver reliable, compliant, and long-term protection for business-critical data. Automate backups and retention policies to meet every customer's recovery target.

### Application & File Storage

Provide scalable and secure storage for SaaS, web, and IT systems. Handle customer uploads, archives, and shared data with ease and full control.

### Content & Media

Host and deliver static websites, digital assets, and media files at lightning speed. Combine with CDN for seamless performance and global reach.

### Data & Analytics

Lay the foundation for data-driven insights with S3-based data lakes. Store, query, and process large datasets for reporting, AI, and machine learning.

## Ready to Offer S3 Under Your Brand

Let's make storage smart, not just big. Access the ZaveIT Marketplace to start white-labeling S3 services and creating value-added offerings for your clients.
