

HASTUS Integration Services

Seamless Connections.
Expertly Delivered.

4

At Treelight, we make the complex simple. Our integration services are designed to connect your HASTUS environment with third-party applications—smoothly, reliably, and with minimal disruption. Whether you're looking to streamline operations, improve data flow, or enhance real-time responsiveness, we've got you covered with both cutting-edge software and expert consulting.

INTEGRATION SOFTWARE BY TREELIGHT

Treelight is actively developing powerful middleware tools that simplify and accelerate the integration of HASTUS with external systems—such as HR, payroll, planning, ticketing, or real-time information platforms. Our software is:

- **Reliable:** Designed for robustness and error-handling.
- **Secure:** Following modern security standards and best practices.
- **User-friendly:** Clear interfaces, dashboards, and monitoring options.

Whether you're working with REST APIs, flat files, or enterprise systems like SAP, our tools make integration intuitive and scalable.

CONSULTING SERVICES

Beyond software, we offer deep expertise in HASTUS integration. Our team of senior consultants bring years of hands-on experience in planning, designing, and executing integration projects. We support you across the entire lifecycle:

- **Reliable:** Designed for robustness and error-handling.
- **Design & Architecture:** We work with your teams to define integration flows, map data sources, and set up scalable architecture.
- **Implementation & Installation:** From writing scripts to configuring endpoints - we handle the technical implementation with precision.
- **Testing & Go-Live Support:** We ensure everything runs smoothly before and after deployment.
- **Monitoring & Maintenance:** Need peace of mind? Treelight can take ownership of interface monitoring, error management, and performance tuning on a daily basis.

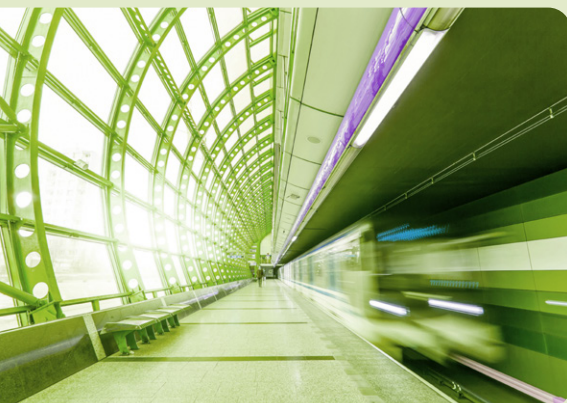

WHY TREELIGHT

- **Integration specialists:** We know HASTUS inside and out, including its APIs and data structure.
- **Project-proven:** We've completed successful projects for public transport operators across Europe.
- **Holistic approach:** We combine software development with operations support—offering a complete solution.
- **Trusted by industry leaders:** Our clients include SNCB, GVB and others who trust us to manage critical systems.

REAL RESULTS, REAL IMPACT

With Treelight's integration services, transport organizations can:

- Automate manual data exchanges
- Reduce operational errors
- Reduce time between design and go-live
- Gain visibility into interface performance
- Free up internal IT and planning teams
