

Rent-a-Scheduler: Secure Excellence in Transit Scheduling

OUTSOURCING SERVICES

Transit organizations worldwide face increasing challenges in managing scheduling staff: **employee turnover, work overload**, and, most critically, the need for innovative and forward-thinking scheduling professionals to address evolving customer needs and organizational ambitions.

This shortage leaves transit organizations vulnerable to financial setbacks and restricts their ability to implement timely schedule changes, adapt to operational demands, and achieve corporate objectives. Meanwhile, the pressure to deliver efficient and effective transit services continues to rise from passengers, drivers, and elected officials.

Scenarios your team might be facing right now

NETWORK REDESIGN

Drafting new schedules for evaluation requires additional effort across your workforce, all while maintaining schedule production for the current network.

DEPARTURES AND/OR TEMPORARY LEAVE

Whether it's unexpected departures, parental leaves or retirements, filling a vacant position is challenging due to the limited pool of scheduling staff and the time required to train talent.

HIRES AND TRAINING

Onboarding new staff demands significant attention from your highly skilled schedulers, diverting their focus from schedule production tasks.

HASTUS SOFTWARE UPGRADES

Staff resources are heavily invested in implementing new features or upgrading HASTUS software, leaving little time for on-going schedule production.

Feeding Downstream IT Systems

For transit agencies operating without scheduling software, feeding essential downstream systems like CAD/AVL, Google Transit and daily operations platforms becomes a significant hurdle. Treelight can address this gap by offering not just skilled schedulers but also the advanced **HASTUS software** as part of the Rent-a-Scheduler solution, enabling seamless system integration with downstream systems.

Rent-a-Scheduler offers immediate support with a team of expert schedulers ready to step in

Combining broad experience, exceptional craftsmanship in all aspects of scheduling, and unmatched proficiency in Giro's HASTUS software, we ensure a proactive partnership, delivering immediate support. No matter your organization's size, project complexity, or transportation modes, our team delivers top-tier performance and valuable insights to elevate your entire scheduling process.

Boost and strengthen your Scheduling Capabilities

The **Rent-a-Scheduler** service extends your scheduling team, builds expertise, and fully harnesses the software's potential, providing instant access to a pool of seasoned schedulers and HASTUS software specialists.

Whether you require **temporary or long-term support, partial or complete outsourcing** for schedule productions, Treelight offers tailored services aligning seamlessly with your operational requirements and strategic goals.

What sets you ahead with Treelight

Schedulers On-Demand

Treelight provides immediate access to scheduling and HASTUS software experts with up to 30 years of experience.

Pierce Transit recognized the expertise and effort needed for scheduling mastery and chose to outsource for 5 years their scheduling to CSched.

Strategic Edge

Treelight goes beyond top-tier performance, we offers strategic insights and expertise across all aspects of scheduling, empowering your entire organization to operate at its full potential.

Fast Turnaround

Treelight is recognized for its ability to hit the ground running and deliver results under tight timelines.

Through a combined approach of Training and Rent-a-Scheduler services, Riverside Transit Agency will achieve full scheduling autonomy.

Tailored Offerings

Treelight offers customized services, whether for temporary or long-term support, partial or full outsourcing for schedule productions.

Robust Foundations

Treelight implements proven scheduling processes, equipping your team to tackle challenges with agility and informed, data-driven decisions.

Outperforming Mindset

Treelight delivers measurable outcomes that improve the rider experience, enhance driver well-being, and reduce transit funding pressures - reflected in lasting partnerships worldwide.

Treelight delivers this solution in collaboration

with CSched, a firm specialized in transit scheduling for over 15 years. CSched brings in-depth operational expertise and extensive experience supporting agencies of all sizes across North America and beyond.
