Rubix Cube Classroom

INSTRUCTIONS:

Rubix Cube Classroom is a great team game; playing duration can take between 5 to 20 minutes. The game is designed on the same principles as the classic brain activity game rubix cube, the first team to have all red, blue, yellow and green cones in a straight line wins.

The difference in our classroom version is that each time you swap 2 cone positions, teams must complete a set exercise and a set question allocated to both cones. For example: if your team choose to play the energiser classroom game, swapping the position of a red and blue cone, the team must complete 5 push ups and 5 squats.

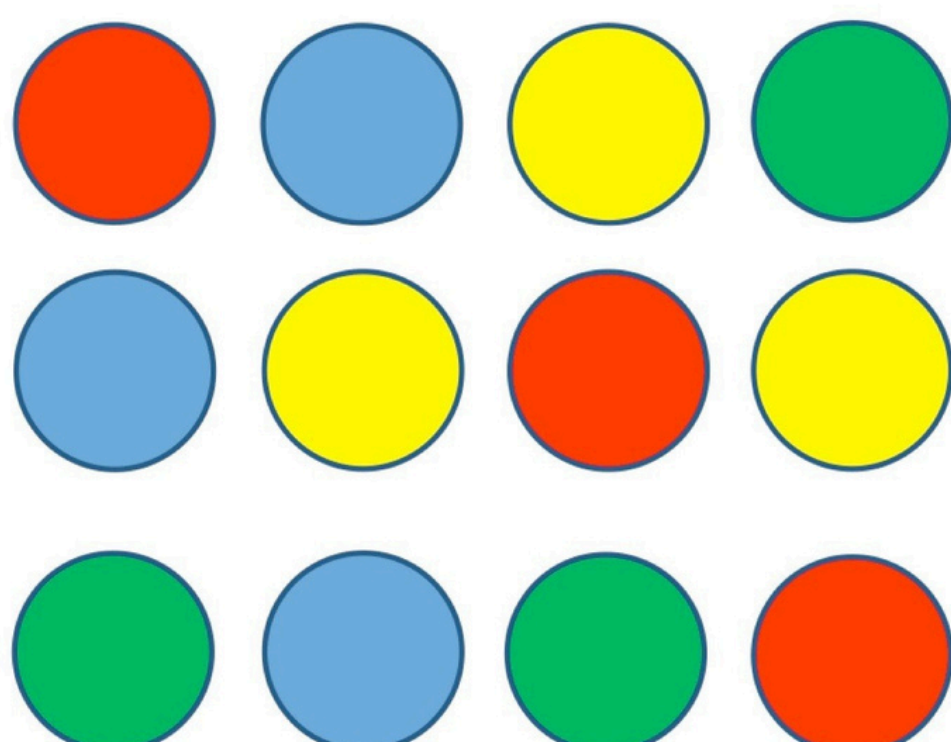

Once the exercise is completed, the team answer the appropriate question for the blue and red cone. For example: General Knowledge game- blue cone question is- write down one capital city from around the world, red cone question is name a healthy food you can eat. When completed teams can choose to move cones, continuing reps and questions until they have the correct sequence.

Below are the game layout options, exercises for each cone colour and rep options for teams to select. Design the game layout to suit your classroom or outside area.

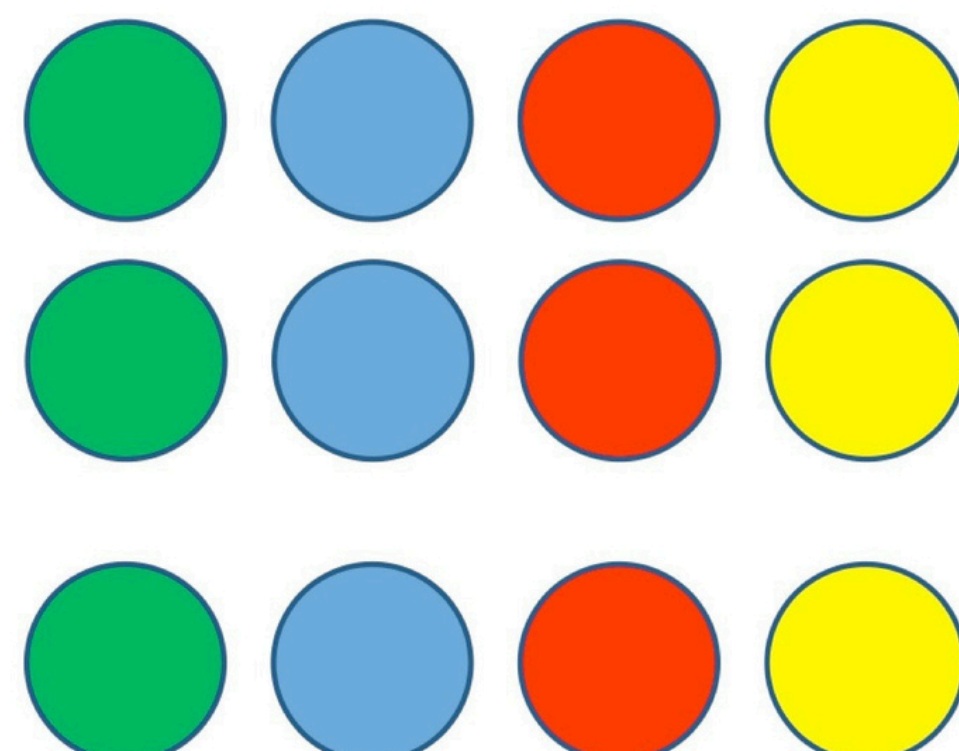

Game layout:

You will need to have three or four cones of each colour. Having 3 cones of each colour will shorten the game duration, compared to 4 cones of each colour (Or you can print out the colour markers we have created with this game). Simply set the cones out in a grid, either 3x3 or 4x4. Mix the colours around. Here is a sample grid:

Starting positions of cones:

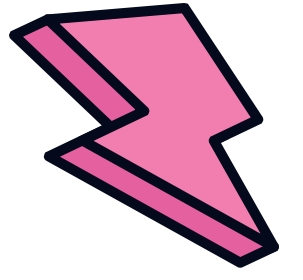

Finished rubix cube:

Rubix Cube Classroom

Exercises for each colour cone:

Coloured cones	Exercises
Red	5 Push ups
Blue	5 Squats
Yellow	5 Sit ups
Green	5 Star jumps
