

## **Qubit Underwriting Awarded Outstanding Professional Services of the Year by Digital Economy Council of Australia (DECA)**

Qubit Underwriting, a leading specialty underwriter pioneering insurance solutions for the digital asset and Web3 ecosystem, is proud to announce that it has been honored with the **Outstanding Professional Services of the Year** award by the Digital Economy Council of Australia (DECA) at The Blockies.

This prestigious accolade recognizes Qubit Underwriting's exceptional contributions to the digital economy through innovative underwriting expertise, combining deep knowledge of blockchain technology with traditional insurance principles. As a Lloyd's coverholder, Qubit provides tailored coverage—including digital asset custodial risks, corporate liability, and protection against operational threats such as external hacks, internal theft, and employee collusion—for institutions including exchanges, custodians, fund managers, payment companies and other Web3 participants.

The award highlights Qubit's role in building trust and resilience in the rapidly evolving digital asset landscape. Being selected as a finalist earlier in the year and ultimately winning underscores the dedication of the entire team and the confidence placed in Qubit by partners across the Asia-Pacific and global markets.

"We are deeply honored to receive this recognition from DECA at The Blockies," said Helen Ye, CEO of Qubit Underwriting. "This award is a testament to our team's relentless focus on innovation, risk management excellence, and supporting the sustainable growth of the digital asset industry. We extend our gratitude to our clients, partners, and the broader ecosystem for their trust and collaboration."

Qubit Underwriting continues to expand its footprint, recently strengthening capabilities through Lloyd's market access and thought leadership at key industry events, including contributions to discussions on regulatory landscapes, compliance, and emerging risks in digital assets.

The Blockies, hosted by DECA, celebrate outstanding achievements across Australia's blockchain and digital economy sectors. Winners are selected by an expert panel for their impact, innovation, and leadership.
