

Solar System Example

[Video Link](#)

Check out Mitch's home, where solar power and family life come together! With 15 solar panels and a backup battery system, Mitch is all set for the long haul. Want to learn more about how solar can work for you? Watch the video and see it in action!

Video Transcription

This is Mitch from Big Dog with my boy Braden and just like everyone else in America, today we are home. I am a Big Dog employee but what some people don't know, is that I am also a Big Dog customer. WE are going to show you our own little system. Here we have our living room, it's pretty awesome!

Camera Man: Hi Mitch's wife!

Melanie: Hi!

Mitch: So on our solar array we have 15, 280 watt panels, and that covers all of the production that we need for the year. Here's our wall of fame for all of the kids artwork. Ta-Da! Covid homeschool 101. Well naturally, it's good to have some sort of backup power in case something happens. Everything here is tied to the batteries, which means on these circuits we can use. Sometimes I like to just go up on the roof and enjoy myself, catch some rays, enjoy some time with panels. Living the dream baby! Anyway, that's my house, that's my family, that's my solar system, you know more about me than my own Mother. Have a great day, see ya later! "Welcome to my world yoast!" -Remember the Titans.

Q&A

How many solar panels are installed at Mitch's home?

Mitch has 15 solar panels installed at his home, each with a capacity of 280 watts. This setup provides all the energy production needed for the year.

Does Mitch's solar system include a backup power source?

Yes, Mitch's solar system includes batteries that serve as a backup power source. This ensures that essential circuits remain functional even if there's a power outage.

What kind of activities does Mitch enjoy related to his solar panels?

Mitch likes to go up on the roof and enjoy the sunshine, spending time with the solar panels. He describes this as "living the dream" and a fun part of having a solar system.

What unique feature does Mitch's home have for displaying family achievements?

Mitch has a "wall of fame" in his home where he displays his kids' artwork. This adds a personal touch to his living space and showcases the family's creativity.

At Big Dog Solar, we're passionate about powering your future with reliable, high-quality solar solutions. With expert craftsmanship and a commitment to innovation, we make switching to solar simple, affordable, and built to last.
