Course Overview

Equip yourself with the leadership skills necessary to effectively manage and integrate generative AI within your teams. This workshop focuses on practical strategies for fostering innovation, leading tech-driven change, and leveraging AI for enhanced team performance and decision-making. You will learn how to align AI initiatives with organizational goals, manage cross-functional AI projects, and cultivate a culture that supports continuous learning and adaptation.

Course Objectives

- Foundational AI Knowledge for Leaders
- Strategic Implementation
- Leading Changes
- Team Dynamics and AI
- Ethics and Governance

Who Should Attend ?

Leaders, managers and anyone wanting to understand the implications of AI on their teams and to leverage and implement AI for strategic advantage.

Methodology

- Interactive lectures introducing AI principles in business leadership contexts.
- Case studies highlighting how successful leaders use AI to improve outcomes.
- Group workshops designed to explore AI adoption challenges, decision-making, and collaboration.
- Hands-on activities where participants map AI strategies to their own organisational goals.
- Action planning sessions to develop a personal roadmap for leading AI-driven change.

Course Prerequisites

There are no formal prerequisites for the AI for Managers & Leaders course. It is suitable for professionals in leadership or managerial roles who wish to understand how AI can support decision-making, productivity, and strategy. While no technical background is required, participants with experience in management or business operations will gain the most value from the sessions.

AI for Project Management Agenda

Introduction to Leadership Needs Emerging from AI

Understand how AI is reshaping leadership roles, expectations, and decision-making in modern organisations.

Strategizing AI Integration

Learn frameworks for aligning AI initiatives with organisational priorities, managing projects, and ensuring measurable results.

Leadership in the Age of AI

Explore how to guide teams through technological disruption and foster an adaptive leadership mindset.

Optimizing Team Performance with AI

Examine tools and approaches that use AI to enhance communication, workflow, and performance tracking within teams.

Ethical Leadership and AI Governance

Discuss responsible AI practices, data privacy, bias prevention, and how leaders can set ethical standards for AI use.

Workshop on AI and Team Dynamics

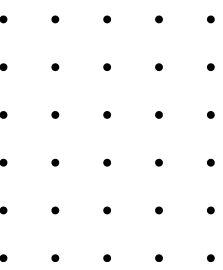

Participate in interactive exercises focused on collaboration, problem-solving, and balancing human–AI workflows.

Metrics and Measurement

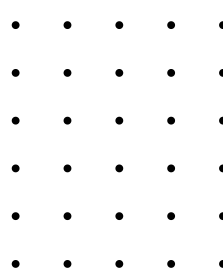

Identify methods to measure AI project success, monitor team performance, and track return on AI investment.

Q&A, Discussion, and Action Planning

Conclude with an open discussion and a structured plan for applying learned strategies in your own organisation.
