

Job Description Template for UI Developer

Job Title: UI Developer

Industry: [Insert Industry – e.g., BFSI, ITeS, Healthcare, etc.]

Location: [Insert Location]

Salary Range: [Insert Salary]

Department: [Insert Department]

Work Hour Allocation: [Insert Details]

POSITION OVERVIEW

As a UI Developer, you will be responsible for creating intuitive, responsive, and visually appealing user interfaces. You will work closely with cross-functional teams to ensure a seamless user experience across web and mobile platforms. This role demands a combination of creativity and technical expertise to build high-quality front-end solutions.

ABOUT THE ORGANIZATION

[Insert Industry-Specific Insights] [Customize this section with a company overview: mission, values, and relevance to the target industry such as BFSI, Healthcare, ITeS, etc. Highlight what sets the company apart.]

LEVEL OF EXPERIENCE / EXPERTISE REQUIREMENTS

(Use as per requirement)

- **Mid-Level (3–5 years):** Proficiency in front-end development tools, frameworks (e.g., React, Vue.js, Angular), and version control systems like Git. Ability to build scalable and maintainable UI components. Experience in responsive design and testing.
- **Senior Level (6+ years):** Strong expertise in UI design principles and front-end technologies. Experience in leading UI development projects, mentoring junior developers, and collaborating with UX/UI designers and back-end teams.

JOB PROFILE SPECIFIC QUALIFICATION

(Add more if required)

- Bachelor's degree in Computer Science, Engineering, or related field.
- Strong understanding of web development fundamentals, including HTML, CSS, and JavaScript.
- Experience with modern JavaScript frameworks (React, Angular, Vue.js, etc.).
- Knowledge of UI/UX principles and best practices.
- Familiarity with version control systems like Git.
- Familiarity with UI testing tools is a plus.

ROLES AND RESPONSIBILITIES

(Use as per level of expertise you require)

- Convert UI/UX wireframes into responsive interfaces using HTML/CSS/JS (Entry Level)
- Develop and maintain reusable UI components and design systems (Mid-Level)
- Integrate front-end functionality with APIs and backend systems (Mid-Level)
- Conduct performance testing and resolve cross-browser issues (Mid-Level)
- Lead UI strategy, review code, and mentor junior developers (Senior Level)
- Stay updated with UI trends and ensure compliance with accessibility standards (All Levels)

Skills Required (Technical + Behavioral):

- Proficiency in HTML, CSS, JavaScript, and modern frameworks (React, Vue.js, Angular).
- Knowledge of responsive web design and mobile-first design principles.
- Familiarity with front-end build tools (Webpack, Babel, etc.).
- Experience with Git and version control systems.
- Strong problem-solving skills and attention to detail.
- Ability to work collaboratively in cross-functional teams.
- Good communication skills to interact with team members and stakeholders.
