

## Extend the Life of **Your Equipment**

---

Plan Ahead with Service and  
Maintenance Plans

“ Not only did Rafael and his team install the wireless scanners [and] maintenance on the computer arms, but the cable management looks fantastic... these arms were installed 10-15 years ago and were in dire need of a tune up. Now they function like they are almost brand new again, which is on par with the new wireless scanning functionality. We really appreciate OSSC’s excellent work and look forward working with your team again!”

— **IT Supervisor** | Boulder area hospital

The **cost** of replacing a single workstation is **81% higher** per unit **than servicing it**.

**Reduce unplanned expenses and extend equipment lifespan with cost-saving service plans that pay for themselves.**

**Extend the life of your equipment and save money** — your dollars are better spent **elsewhere**.

**Predictable** maintenance plans so you can **budget with confidence**.

We saved one Denver-based safety net hospital an estimated **\$250K** in one budget cycle with preventative maintenance.

# Unnecessary stress. Avoidable costs.

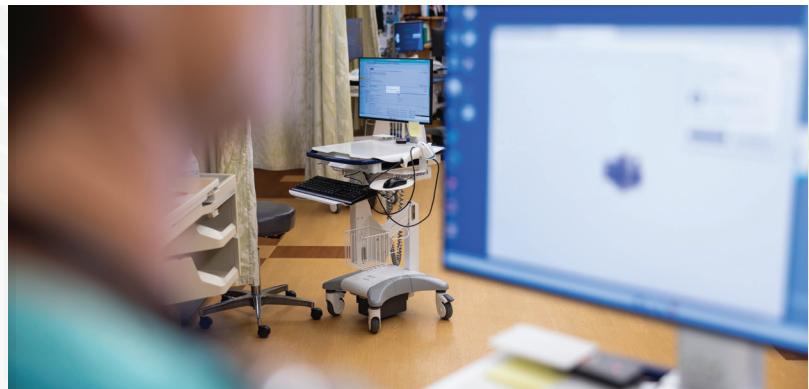

## Why Hospitals Trust OSSC

For **over 30 years**, hospitals have trusted OSSC to extend the life of their equipment, ensuring workstations, batteries, and mobile units stay operational **longer**. Our focus isn't just on fixing equipment — it's about **preventing failures before they happen** and helping customers plan ahead.

**Preventative maintenance that pays for itself.** No surprises. No unnecessary costs. Just smarter service that protects your investment.
