

REGENT<sup>TM</sup> doors were then developed to fill the need for a superior insulating door. Working with contractors, design professionals, and building owners, we identified target performance criteria for cold storage doors and developed a door that met those criteria. In 1984, we began manufacturing and selling REGENT<sup>TM</sup> cold storage doors. We cover all the bases for all your cold storage door needs. If you have unique requirements and conditions for a Specialty Door, reach out and we will manufacture it for you.

## Vertical Lift Door

The REGENT<sup>TM</sup> brand vertical lift cold storage door is designed for both interior and exterior applications, offering a space-efficient solution ideal for environments where floor space is limited. This door lifts vertically, allowing for maximum use of available space and providing an unobstructed opening for easy access. Constructed with high-performance insulation materials, the vertical lift door ensures superior thermal efficiency, maintaining consistent temperatures and reducing energy costs. Its durable design and robust sealing system prevent air leakage, making it suitable for harsh outdoor conditions as well as controlled indoor environments. Additionally, the door can be equipped with automated lifting mechanisms and various locking options to enhance security and operational efficiency.

REGENT™ also offers a range of additional doors including single & bi-parting horizontal doors for wide access, and swing doors for easy entry and exit. Specialty doors are available for unique requirements, providing versatile options for various cold storage needs.

Advance Insulation Concepts complements these doors with ISOWALL insulated panels, Insulrock fire-rated panels, and Oktopus Vacuum Panel Lifting Technology.

## CONTACT US FOR THE AVAILABLE DOOR OPTIONS
