

REGENT™ doors were then developed to fill the need for a superior insulating door. Working with contractors, design professionals, and building owners, we identified target performance criteria for cold storage doors and developed a door that met those criteria. In 1984, we began manufacturing and selling REGENT™ cold storage doors. We cover all the bases for all your cold storage door needs. If you have unique requirements and conditions for a Specialty Door, reach out and we will manufacture it for you.

## **Swing Door**

REGENT™ brand swing door, offered by Advanced Insulation Concepts, Inc., is an ideal solution for cold storage environments where ease of access and reliable insulation are paramount. Designed for smooth and efficient operation, this door swings open on sturdy hinges, allowing quick entry and exit for personnel and equipment. The door's high-quality insulation materials ensure excellent thermal performance, keeping cold air in and warm air out, thus maintaining the desired temperature and reducing energy costs. The robust construction of the swing door ensures durability and long-term performance, even in high-traffic areas.

Advanced Insulation Concepts, Inc. enhances the functionality of the REGENT™ swing door with a range of customizable features. The door can be fitted with various locking mechanisms to meet specific security needs, and automated options are available for hands-free operation, improving workflow efficiency. The swing door's exterior is designed to withstand the demanding conditions of industrial environments, featuring a protective finish that resists wear and corrosion. Whether used in food processing facilities, pharmaceutical storage, or other temperature-sensitive applications, the REGENT™ swing door offers a dependable, efficient, and versatile solution for maintaining optimal cold storage conditions.
