

REGENTTM doors were then developed to fill the need for a superior insulating door. Working with contractors, design professionals, and building owners, we identified target performance criteria for cold storage doors and developed a door that met those criteria. In 1984, we began manufacturing and selling REGENTTM cold storage doors. We cover all the bases for all your cold storage door needs. If you have unique requirements and conditions for a Specialty Door, reach out and we will manufacture it for you.

Single Horizontal Door

REGENTTM brand cold storage doors are renowned for their durability, efficiency, and high performance in temperature-controlled environments. Specifically designed for cold storage applications, these doors are engineered to provide superior insulation, ensuring minimal thermal transfer and maximum energy efficiency. The single horizontal door model from REGENTTM features robust construction with a heavy-duty frame and high-quality insulation materials, making it ideal for maintaining consistent temperatures in cold storage facilities.

The door's design incorporates advanced sealing technology to prevent air leakage, thereby enhancing the overall energy efficiency and maintaining the integrity of stored goods. Additionally,

Regent's cold storage doors are equipped with user-friendly features such as easy-to-operate handles, smooth sliding mechanisms, and automated options for enhanced convenience. The door's exterior is coated with a protective finish to withstand the rigors of a demanding industrial environment, ensuring longevity and reliability. Whether used in food processing plants, pharmaceutical storage, or other cold storage applications, Regent's single horizontal cold storage door offers a dependable solution that combines functionality, efficiency, and durability.

Horizontal Track

The track and slide mechanism of the REGENT™ brand cold storage door ensures smooth and effortless operation, designed to withstand frequent use in demanding environments. Its precision-engineered components provide reliable performance, reducing friction and wear while maintaining an airtight seal for optimal temperature control.

Optional - Outside Handle and Lock

The outside handle and lock of the REGENT™ brand cold storage door are designed for ease of use and security, featuring a robust construction that ensures reliable access control. Additionally, REGENT™ offers a variety of other locking mechanisms to meet specific security needs and operational requirements.
