# LakeStack is the no-code, data & Al platform built for AWS Customers by applify

### How LakeStack Helps AWS Customers Unlock AI at Scale.

LakeStack empowers businesses to modernize their data and adopt AI by enabling faster deployment of services like Glue, Redshift, Bedrock, SageMaker, and QuickSight. Thus, reducing time-to-value from months to weeks.

### Faster Workloads. Faster Consumption. Faster Wins.

LakeStack solves the biggest blocker, "data readiness". By automating ingestion, governance, and activation inside the customer's AWS environment, our data lakehouse solution drives faster workload creation, deeper service consumption, and measurable MAP impact.

Activate Bedrock,
SageMaker, Redshift,
and Glue in days, not
months.

### Scale usage

Drive recurring consumption across analytics, AI, and data services within AWS.

#### Close quicker

of businesses fully unlock value from their Shorter timeto-value means AWS teams meet MAP outcomes faster.

Innovating and engineering success since 2014

# LakeStack accelerates innovation for AWS across data, analytics, and Al

Modernize (No-code data onboarding)

Unify data from ERP, CRM, IoT, and business systems directly inside your AWS account.

Analyze (Enable self-serve analytics for every team)

Governed, Al-ready datasets power instant dashboards and cross-department insights.

Innovate (Unlock Al-powered intelligence)

Generate insights, summaries, and predictions using SageMaker, Bedrock, and QuickSight.

Scale (Enterprise-wide Al rollout made simple)

Extend governance, security, and compliance effortlessly across teams and regions at scale.

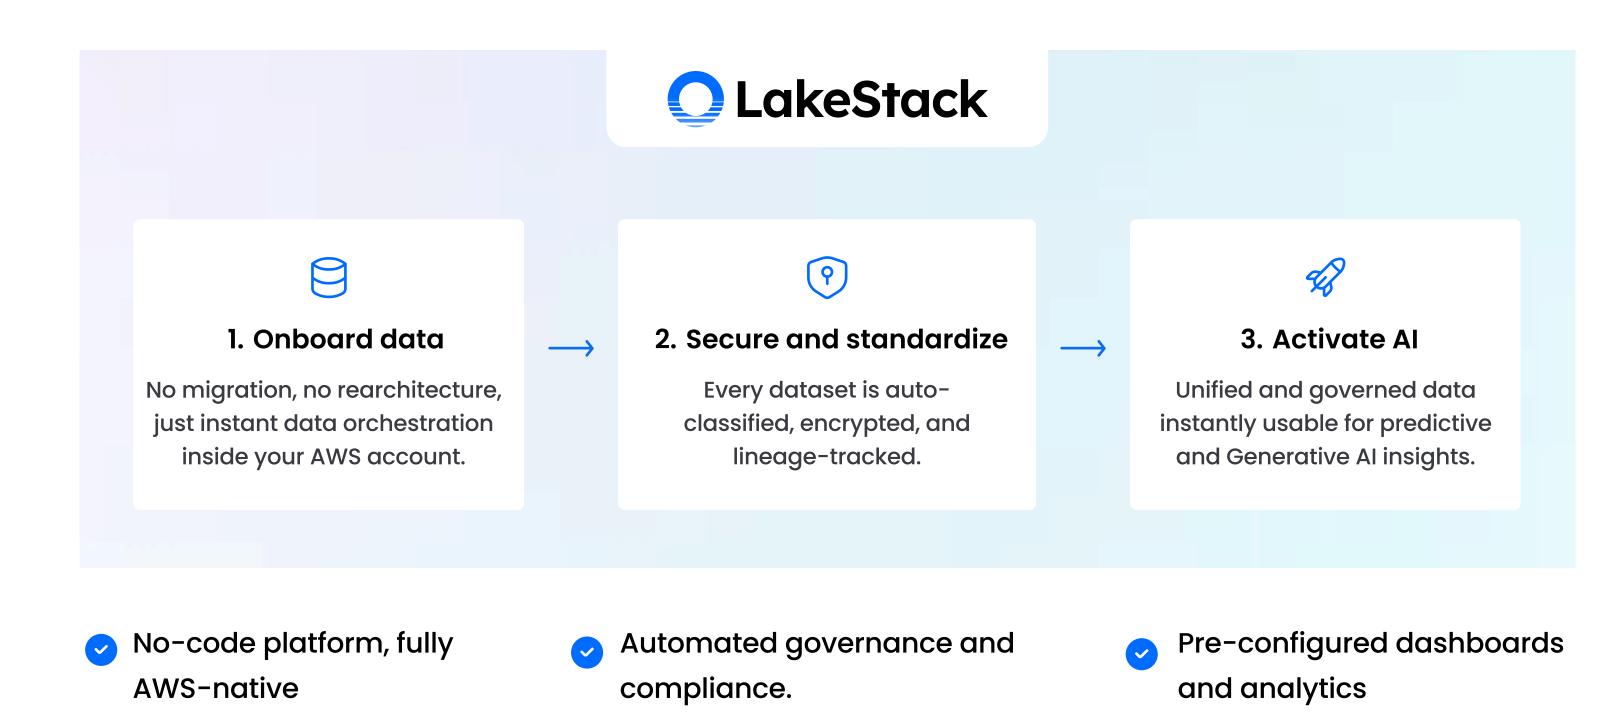

### **How it works**

## What once took months of data prep now deploys in days with LakeStack.

Can data readiness and governance be automated without heavy IT involvement? Can GenAl projects start quickly without custom builds or manual pipelines? Yes Can deployment happen securely inside your customer's AWS account, with full compliance? Yes Can Bedrock, SageMaker, or any Al workload connect instantly once the data is activated? Yes

### AFG.tech

AFG.Tech built a unified, governed data foundation with LakeStack, accelerating predictive maintenance across its global operations

Within four weeks, the team automated ingestion pipelines, enforced compliance, and enabled AI-ready analytics that power predictive maintenance, warranty intelligence, and supplier quality insights across plants and regions.
