Statement of	

#### United States of America Department of Homeland Security United States Coast Guard

Certification Date: 11 Aug 2023 Expiration Date: 11 Aug 2024

#### **Temporary Certificate of Inspection**

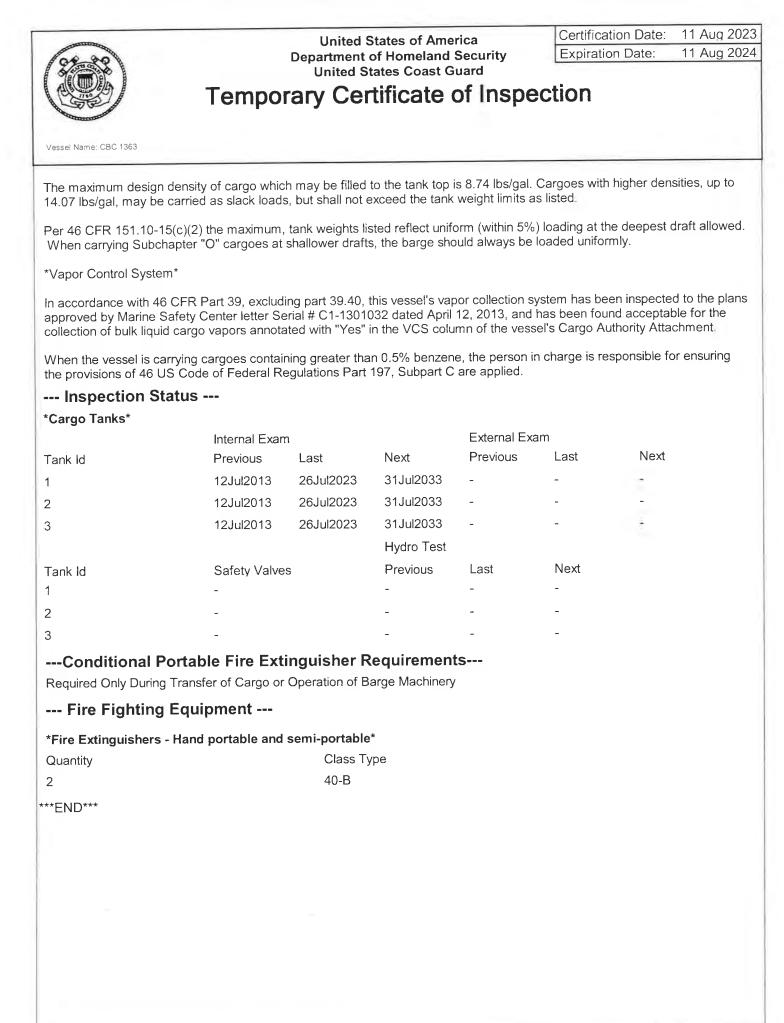

For ships on international voyages this certificate fulfills the requirements of SOLAS 74 as amended, regulation V/14, for a SAFE MANNING DOCUMENT This Temporary Certificate of Inspection is issued under the provision of Title 46 United States Code, Section 399, in lieu of the regular certificate of inspection, and shall be in force only until the receipt on board said vessel of the original certificate of inspection, this certificate in no case to be valid after one year from the date of inspection

Only Grade A and lower cargoes and specified hazardous cargoes named in the barge's Cargo Authority Attachment (CAA), serial # C1-1301032 dated April 12, 2013, may be carried. The specified hazardous cargoes may be carried only in the tanks indicated.

Per 46 CFR 150.130, the Person in Charge of the barge is responsible for ensuring that the compatibility requirements of 46 CFR 150 are met. Cargoes must be checked for compatibility using the figures, tables and appendices of 46 CFR 150 in conjunction with the reactive group numbers from the "COMPAT GROUP NO" column listed in the vessel's Cargo Authority Attachment, serial # C1-1301032 dated April 12, 2013.

Notes: 1. Under Environmental Control, Tanks, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo tanks,

2. Under Environmental Control, Handling Space, NR means that the tank group is suitable only for those cargoes which require no environmental control in the cargo handling space. NA means that the vessel does not have a cargo control space, and this requirement is not applied.

3. Under Electrical Hazard Class, NA means that the tank group is suitable only for those cargoes which have no electrical hazard class requirement. NR means that the vessel has no electrical equipment located in a hazardous location.

Vessel Name: CBC 1363 Official #: 1244701

Page 8 of 8

Shipyard: Southwest Shi Hull #: 9688

#### Explanation of terms & symbols used in the Table:

Cargo Identification	
Name	The proper shipping name as listed in 46 CFR Table 30 25-1, 46 CFR Table 151 05, and 46 CFR Part 153 Table 2
Chem Code none	The three letter designation assigned to the cargo in the Chemical Hazards Response Information System (CHRIS) Manual Certain mixtures of cargoes may not have a CHRIS Code assigned.
Compatability Group No	The cargo reactive group number assigned for compatibility determinations in 46 CFR Part 150 Tables I and II. In accordance with 46 CFR 150.130, the Person-in-Charge of the barge is responsible for ensuring that the compatibility requirements of 46 CFR Part 150 are met. Cargoes must be checked for compatibility using the figures, tables,
Note 1	and appendices of 46 CFR 150 in conjunction with the assigned reactive group number Because of the very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chort - Exercities and a specific group in the sector of Company and
Note 2	Compatibility Chart For additional compatibility information, contact Commandant (CG-3PSO-3), U S Coast Guard, 2100 Second Street, SW, Washington, DC 20593- 0001 Telephone (202) 372-1425 See Appendix I to 46 CFR Part 150 - exceptions to the compatability chart
Subchapter Subchapter D Subchapter O Note 3	The subchapter in Title 46 Code of Federal Regulations under which the cargo has been classified Those flammable and combustible liquids listed in 46 CFR Table 30 25-1 Those hazardous cargoes listed in 46 CFR Table 151 05 and 46 CFR Part 153 Table 2. Those cargoes listed in 46 CFR Part 153 Table 2 are non-regulated cargoes when carried in bulk on non-oceangoing barges
Grade	The cargo classification assigned to each flammable or combustible liquid Grades inside of "{ }" indicate a provisional assignment based upon literature sources which were not verified by manufacturers data The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for
A, B, C D, E	carriage of that grade of cargo Flammable liquid cargoes, as defined in 46 CFR 30-10 22 Combustible liquid cargoes, as defined in 46 CFR 30-10 15
Note 4 NA	The flammability/combustibility grade of these cargoes may vary depending upon the flashpoint and Reid vapor pressure The Person-in-Charge shall verify the cargo grade based on Manufacturers data and ensure that the barge is authorized for carriage of that grade of cargo
#	Those subchapter O cargoes which are not classified as a flammable or combustible liquid No flammability/combustibility grade has been assigned yet, as the necessary flash point/vapor pressure data for such assignments are presently not available
Hull Type	The required barge hull classification for carriage of the specified Subchapter O hazardous material cargo, see 46 CFR 151.10-1 Designed to carry products which require the maximum preventive measures to preclude the uncontrolled release of the cargo. See 46 CFR 151 10-1(b)(1).
ii.	Designed to carry products which require significant preventive measures to preclude the uncontrolled release of cargo See 46 CFR 151 10-1(b)(3)
III NA	Designed to carry products of sufficeint hazard to require a moderate degree of control See 46 CFR 151 10-1(b)(4) Not applicable to barges certificated under Subchapter D
Conditions of Carriage	
Tank Group	The vessel's lank group (as defined in Section 4) which is authorized for carriage of the named cargo
Vapor Recovery Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo. No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo
Conditions of Carriage	
Tank Group Vapor Recovery	The vessel's tank group (as defined under the "46 CFR Tank Group Characteristics" listed on page 1) which is authorized for carriage of the named cargo
Approved (Y or N)	Yes: The vessel's VCS has been reviewed and approved by the MSC to control vapors of the specified cargo No: The vessel's VCS has been reviewed and is not approved by the MSC to control vapors of the specified cargo
VCS Calegory:	The specified cargo's provisional classification for vapor control systems
Category 1	(No additional VCS requirements above those for benzene, gasolines and crude oil) All requirements applying to the handling of oil and hazardous materials in Titles 33 and 46 Code of Federal Regulations (CFR) apply to these cargoes Those specifically dealing with vapor control systems are in 33 CFR 155 750, 33 CFR 156 120, 33 CFR 156 170, 46 CFR 3535 and 46 CFR 39. The cargo tank venting system calculations (46 CFR 39 20-11) and the pressure drop calculations (46 CFR 39.30- 1(b)) must use appropriate friction factors, vapor densities and vapor growth rates
Category 2	(Polymerizes) Polymerization and residue build-up of these cargoes can adversely affect the vessel by fouling safety components and restricting vapor flow which could lead to cargo tank overpressurization. The vessel's owner must develop a method of ensuring all VCS safety components are functional and polymer build-up is not causing an unsafe condition due to increased pressure in the vapor control piping and cargo tanks. The method shall be acceptable to the local Officer in Charge, Marine Inspection. This is in addition to the requirements of Category 1 Please note that a material not normally considered a monomer can be a problem in detonation
Category 3	(Highly toxic) VCSs for these toxic cargoes cannot use a spill valve or rupture disk as the primary means to meet the overfill protection requirement of 46 CFR 39 20-9 This requirement is in addition to the requirements of Category 1
Category 4	(Polymerizes and highly loxic) Must comply with requirements of Categories 1, 2 and 3
Category 5	(High vapor pressure) VCS pressure drop calculations for cargoes with a vapor pressure greater than 147 psia at 115 F must take into account increased vapor-air mixture densities and vapor growth rates as compared to Category 1 cargoes Consult the Marine Safety Center's VCS Guidelines for further information. This requirement is in addition to the requirements of Category 1
Calegory 6	(High vapor pressure and highly toxic) Must comply with requirements of Categories 1, 3 and 5
Category 7	(High vapor pressure and polymerizes) Must comply with requirements of Categories 1, 2 and 5
none	The cargo has not been evaluated/classified for use in vapor control systems
